PDP-5004

ORDER NO.  
**ARP3221**

## PLASMA DISPLAY

# PDP-5004

# PDP-4304

# PDP-5014

# PDP-4314

**THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).**

Model	Type	Power Requirement	Remarks
PDP-5004	KUC	AC120V	
PDP-5014	KUC	AC120V	
PDP-4304	KUC	AC120V	
PDP-4314	KUC	AC120V	

For details, refer to "Important Check Points for Good Servicing".

# SAFETY INFORMATION

This service manual is intended for qualified service technicians ; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

## WARNING

This product contains lead in solder and certain electrical parts contain chemicals which are known to the state of California to cause cancer, birth defects or other reproductive harm.

Health & Safety Code Section 25249.6 - Proposition 65

## NOTICE

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

## REMARQUE

(POUR MODÈLE CANADIEN SEULEMENT)

Les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

## SAFETY PRECAUTIONS

NOTICE : Comply with all cautions and safety related notes located on or inside the cabinet and on the chassis.

The following precautions should be observed :

1. When service is required, even though the PDP UNIT an isolation transformer should be inserted between the power line and the set in safety before any service is performed.
2. When replacing a chassis in the set, all the protective devices must be put back in place, such as barriers, nonmetallic knobs, adjustment and compartment covershields, isolation resistor-capacitor, etc.
3. When service is required, observe the original lead dress. Extra precaution should be taken to assure correct lead dress in the high voltage circuitry area.
4. Always use the manufacture's replacement components. Especially critical components as indicated on the circuit diagram should not be replaced by other manufacture's. Furthermore where a short circuit has occurred, replace those components that indicate evidence of overheating.
5. Before returning a serviced set to the customer, the service technician must thoroughly test the unit to be certain that it is completely safe to operate without danger of electrical shock, and be sure that no protective device built into the set by the manufacture has become defective, or inadvertently defeated during servicing. Therefore, the following checks should be performed for the continued protection of the customer and servicetechnician.
  6. Perform the following precautions against unwanted radiation and rise in internal temperature.
    - Always return the internal wiring to the original styling.
    - Attach parts (Gasket, Ferrite Core, Ground, Rear Cover, Shield Case etc.) surely after disassembly.
  7. Perform the following precautions for the PDP panel.
    - When the front case is removed, make sure nothing hits the panel face, panel corner, and panel edge (so that the glass does not break).
    - Make sure that the panel vent does not break. (Check that the cover is attached.)
    - Handle the FPC connected to the panel carefully. Twisting or pulling the FPC when connecting it to the connector will cause it to peel off from the panel.
  8. Pay attention to the following.
    - When the front case is removed, infrared ray is radiated and may disturb reception of the remote control unit.
    - Pay extreme caution when the front case and rear panel are removed because this may cause a high risk of disturbance to TVs and radios in the surrounding.

### Leakage Current Cold Check

With the AC plug removed from an AC power source, place a jumper across the two plug prongs. Turn the AC power switch on. Using an insulation tester (DC 500V), connect one lead to the jumpered AC plug and touch the other lead to each exposed metal part (input/output terminals, screwheads, metal overlays, control shafts, etc.), particularly any exposed metal part having a return path to the chassis. Exposed metal parts having a return path to the chassis should have a minimum resistor reading of  $0.3M\Omega$  and a maximum resistor reading of  $5M\Omega$ . Any resistor value below or above this range indicates an abnormality which requires corrective action. Exposed metal parts not having a return path to the chassis will indicate an open circuit.

### Leakage Current Hot Check

Plug the AC line cord directly into an AC power source (do not use an isolation transformer for this check).

Turn the AC power switch on.

Using a "Leakage Current Tester (Simpson Model 229 equivalent)", measure for current from all exposed metal parts of the cabinet (input/output terminals, screwheads, metal overlays, control shaft, etc.), particularly any exposed metal part having a return path to the chassis, to a known earth ground (water pipe, conduit, etc.). Any current measured must not exceed  $0.5mA$ .

AC Leakage Test

**ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE SET TO THE CUSTOMER.**

### PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in PIONEER set have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a  $\Delta$  on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

## ■Charged Section

The places where the commercial AC power is used without passing through the power supply transformer.

If the places are touched, there is a risk of electric shock. In addition, the measuring equipment can be damaged if it is connected to the GND of the charged section and the GND of the non-charged section while connecting the set directly to the commercial AC power supply. Therefore, be sure to connect the set via an insulated transformer and supply the current.

1. AC Power Cord
2. AC Inlet with Filter
3. Power Switch (S1)
4. Fuse (In the POWER SUPPLY Unit)
5. STB Transformer and Converter Transformer (In the POWER SUPPLY Unit)
6. Other primary side of the POWER SUPPLY Unit

## ■High Voltage Generating Point

The places where voltage is 100V or more except for the charged places described above. If the places are touched, there is a risk of electric shock.

1. POWER SUPPLY Unit.....(223V)
2. 50 X DRIVE Assy .....(-230V to 223V)
3. 50 Y DRIVE Assy .....(353V)
4. 50 SCAN A Assy ..... (353V)
5. 50 SCAN B Assy ..... (353V)
6. X CONNECTOR A Assy.....(-230V to 223V)
7. X CONNECTOR B Assy.....(-230V to 223V)

▨ : Part is Charged Section.

□ : Part is the High Voltage Generating Points other than the Charged Section.

### •For 50 inch model (PDP-5004, PDP-5014)

## [Important Check Points for Good Servicing]

In this manual, procedures that must be performed during repairs are marked with the below symbol.  
Please be sure to confirm and follow these procedures.

### 1. Product safety

Please conform to product regulations (such as safety and radiation regulations), and maintain a safe servicing environment by following the safety instructions described in this manual.

- ① Use specified parts for repair.

Use genuine parts. Be sure to use important parts for safety.

- ② Do not perform modifications without proper instructions.

Please follow the specified safety methods when modification (addition/change of parts) is required due to interferences such as radio/TV interference and foreign noise.

- ③ Make sure the soldering of repaired locations is properly performed.

When you solder while repairing, please be sure that there are no cold solder and other debris.  
Soldering should be finished with the proper quantity. (Refer to the example)

- ④ Make sure the screws are tightly fastened.

Please be sure that all screws are fastened, and that there are no loose screws.

- ⑤ Make sure each connectors are correctly inserted.

Please be sure that all connectors are inserted, and that there are no imperfect insertion.

- ⑥ Make sure the wiring cables are set to their original state.

Please replace the wiring and cables to the original state after repairs.  
In addition, be sure that there are no pinched wires, etc.

- ⑦ Make sure screws and soldering scraps do not remain inside the product.

Please check that neither solder debris nor screws remain inside the product.

- ⑧ There should be no semi-broken wires, scratches, melting, etc. on the coating of the power cord.

Damaged power cords may lead to fire accidents, so please be sure that there are no damages.  
If you find a damaged power cord, please exchange it with a suitable one.

- ⑨ There should be no spark traces or similar marks on the power plug.

When spark traces or similar marks are found on the power supply plug, please check the connection and advise on secure connections and suitable usage. Please exchange the power cord if necessary.

- ⑩ Safe environment should be secured during servicing.

When you perform repairs, please pay attention to static electricity, furniture, household articles, etc. in order to prevent injuries.  
Please pay attention to your surroundings and repair safely.

### 2. Adjustments

To keep the original performance of the products, optimum adjustments and confirmation of characteristics within specification.  
Adjustments should be performed in accordance with the procedures/instructions described in this manual.

### 3. Lubricants, Glues, and Replacement parts

Use grease and adhesives that are equal to the specified substance.  
Make sure the proper amount is applied.

### 4. Cleaning

For parts that require cleaning, such as optical pickups, tape deck heads, lenses and mirrors used in projection monitors, proper cleaning should be performed to restore their performances.

### 5. Shipping mode and Shipping screws

To protect products from damages or failures during transit, the shipping mode should be set or the shipping screws should be installed before shipment. Please be sure to follow this method especially if it is specified in this manual.

## ■ PLASMA DISPLAY

### General (PDP-5004 /PDP-5014)

Light emission panel ..... 50-inch AC Plasma Panel  
109.8 (W) x 62.1 (H) x 126.1 (diagonal) cm

Number of pixels ..... 1280 x 768

Power supply ..... AC 120 V, 60 Hz

Rated current ..... 3.1 A

Standby power consumption ..... 0.6 W

External dimensions  
.... 1218 (W) x 714 (H) x 98 (D: Not including handles) mm  
47-31/32 (W) x 28-1/8 (H) x 3-7/8 (D: Not including handles) in.

Weight ..... 41.0 kg (90 lbs. 7 oz)

Operating temperature range ..... 0 to 40 °C (32 to 104°F)

### General (PDP-4304/ PDP-4314)

Light emission panel ..... 43-inch AC Plasma Panel  
95.2 (W) x 53.6 (H) x 109.3 (diagonal) cm

Number of pixels ..... 1024 x 768

Power supply ..... AC 120 V, 60 Hz

Rated current ..... 2.6 A

Standby power consumption ..... 0.6 W

External dimensions  
.... 1070 (W) x 630 (H) x 98 (D: Not including handles) mm  
42-1/8 (W) x 24-13/16 (H) x 3-7/8 (D: Not including handles) in.

Weight ..... 33.5 kg (73 lbs. 14 oz)

Operating temperature range ..... 0 to 40 °C (32 to 104°F)

### Input/output Video

#### INPUT1

Input

- Mini D-sub 15 pin (socket connector)
- RGB signal (G ON SYNC compatible)  
RGB ... 0.7 Vp-p/75Ω/no sync.  
HD/CS, VD ... TTL level  
/positive and negative polarity  
/2.2 kΩ  
G ON SYNC  
... 1 Vp-p/75Ω/negative sync.  
\*Compatible with Microsoft Plug & Play  
(VESA DDC1/2B)
  - Component video signal  
Y ... 1 Vp-p/75Ω negative sync.  
Cb/Pb, Cr/Pr ... 0.7 Vp-p (color100%)/75Ω

#### INPUT2

Input

- HDMI
- Digital signal  
3.3V T.M.D.S. /50Ω

#### INPUT3

Input

- S jack (Mini DIN 4 pin)
- Y/C separate video signal  
Y ... 1 Vp-p/75Ω/negative sync.  
C ... 0.286 Vp-p/75Ω  
(Color Burst Level)

#### INPUT4

Input

- RCA jack
- Composite video signal  
1 Vp-p/75Ω/negative sync.

Output

- RCA jack  
75Ω /with buffer

#### INPUT5

Input

- RCA jack
- Component video signal  
Y...1 Vp-p /75Ω negative sync.  
Cb/Pb, Cr/Pr...  
0.7 Vp-p (color 100%) / 75Ω
  - RGB signal  
G ON SYNC ...  
1 Vp-p/75Ω/negative sync.  
R/B ... 0.7 Vp-p/75Ω/no sync.

### Audio

Input

- AUDIO INPUT (for INPUT1)  
Pin jack (x2)  
L/R ... 500 mVrms/more than 10 kΩ
- AUDIO INPUT (for INPUT2)  
Pin jack (x2)  
L/R ... 500 mVrms/more than 10 kΩ
- AUDIO INPUT (for INPUT3)  
Pin jack (x2)  
L/R ... 500mVrms/more than 10 kΩ
- AUDIO INPUT (for INPUT4)  
Pin jack (x2)  
L/R ... 500mVrms/more than 10 kΩ
- AUDIO INPUT (for INPUT5)  
Pin jack (x2)  
L/R ... 500mVrms/more than 10 kΩ

Output

- SPEAKER  
L/R ... 8 – 16Ω/7 W +7 W (at 8Ω)

### Control

- RS-232C... D-sub 9 pin (pin connector)

## ● Accessories

- Power Cord (ADG1215)

- Remote Control Unit for PDP-5004, PDP-4304 (AXD1496)

- Cleaning Cloth (for wiping front panel) (AED1208)

- Remote Control Unit for PDP-5014, PDP-4314 (AXD1497)

- Binder Assy (AEC1758)

- Speed Clamp (×2)

- Bead Bands (×2)

- Dry Cell Battery (R6P, AA)

## 2. EXPLODED VIEWS AND PARTS LIST

- NOTES:**
- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
  - The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
  - Screws adjacent to ▼ mark on product are used for disassembly.
  - For the applying amount of lubricants or glue, follow the instructions in this manual. (In the case of no amount instructions, apply as you think it appropriate.)

### 2.1 PACKING for PDP-5004, PDP-5014, PDP-4304 and PDP-4314 models

### 3.1.12 AUDIO AMP and COMM SLOT ASSYS

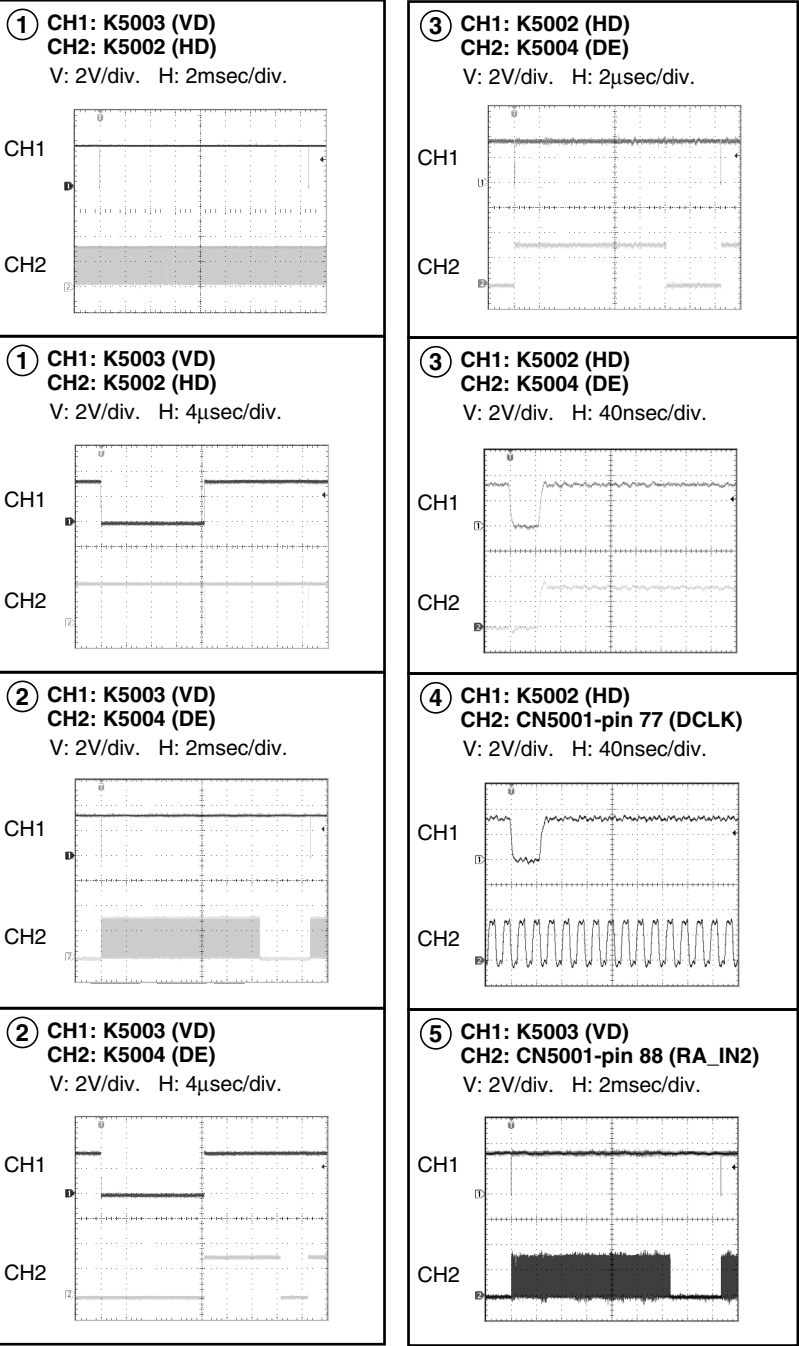

### 3.1.13 VIDEO SLOT 2 ASSY

**DIGITAL VIDEO ASSY (4/6)**  
**• DIGITAL I/F BLOCK**

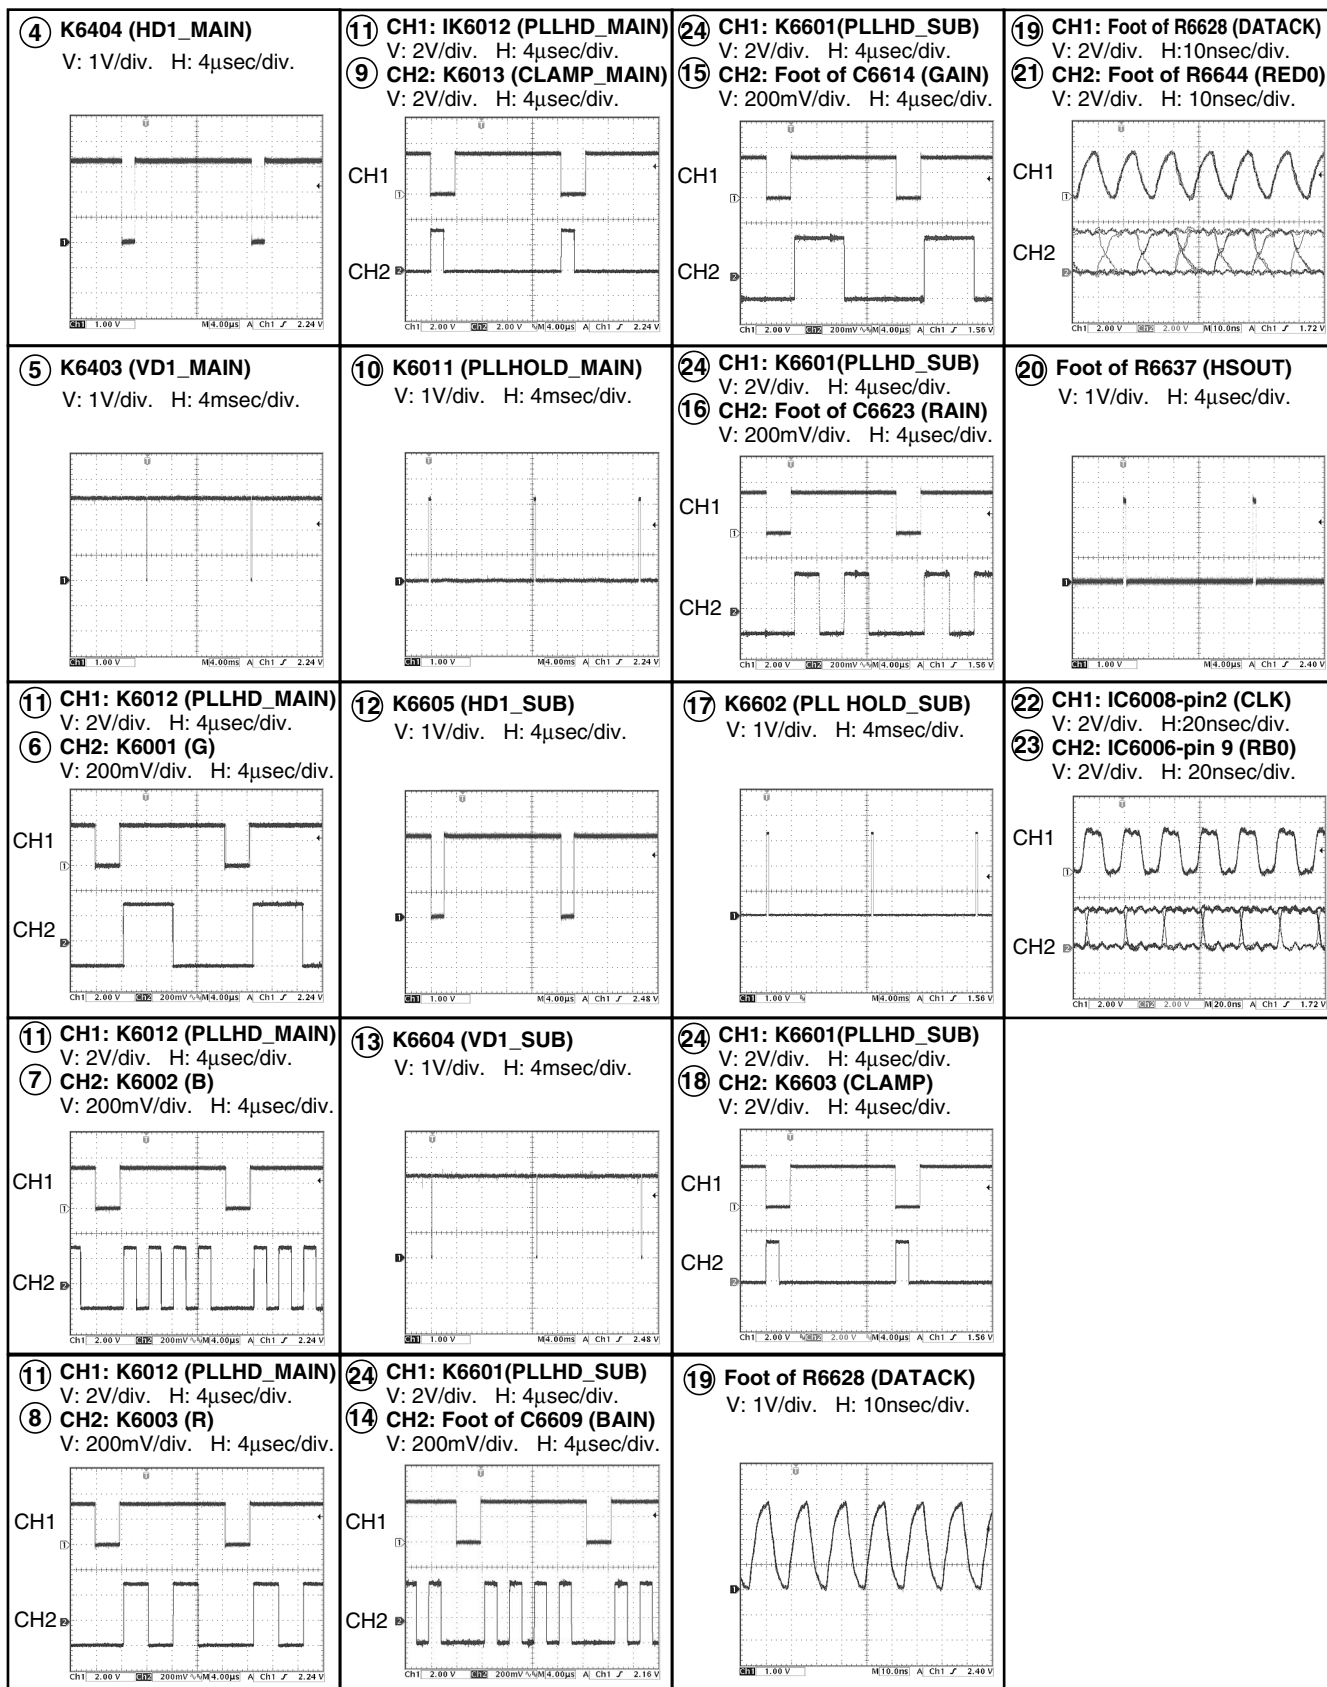

# RGB ASSY (2/10, 3/10, 4/10)

## MAUN AD BLOCK, MAIN LPF BLOCK, SUS LPF&AD BLOCK

Input: INPUT 1

Signal: RGB, XGA 60 Hz, Color-bar

(12) to (21), (24) : With two screens, a SUB screen chooses INPUT1 and observes it.

## VIDEO SLOT 2 ASSY (1/4)

### • IC1(CVBS) BLOCK

Input: INPUT 4

Signal: NTSC 525i, Color-bar

### AV I/O ASSY (1/3)

#### • AV I/O BLOCK

##### • VIDEO

Input: INPUT 1

Signal: RGB, XGA 60 Hz, Color-bar

### VIDEO SLOT2 ASSY (4/4)

#### • SIGNAL SW BLOCK

- ①9 (-) side of C7908 (G/Y)  
V: 200mV/div. H: 20μsec/div.

- ②0 (-) side of C7912 (B/Cb)  
V: 200mV/div. H: 20μsec/div.

- ②1 (-) side of C7917 (R/Cr)  
V: 200mV/div. H: 20μsec/div.

- ① CH1: CN7605-pin 10(HD\_IO)  
V: 2V/div. H: 5μsec/div.  
② CH2: CN7605-pin 16 (R\_IO)  
V: 500mV/div. H: 5μsec/div.

- ⑥ CH1: JA7606-pin 13 (HD)  
V: 2V/div. H: 5μsec/div.  
⑧ CH2: JA7606-pin 2 (G)  
V: 500mV/div. H: 5μsec/div.

### AV I/O ASSY (1/3)

#### • AV I/O BLOCK

##### • AUDIO

Input: INPUT 1

Signal: 200mVrms, 1 kHz input,  
VOL MAX

- ①1 IC7601-pin 12 (L-AUDIO)  
V: 200mV/div. H: 500μsec/div.

- ①2 IC7603-pin 14 (L-AUDIO)  
V: 200mV/div. H: 500μsec/div.

- ①3 CH1: CN7601-pin 14 (+L\_OUT)  
V: 200mV/div. H: 500μsec/div.  
①4 CH2: CN7601-pin 13 (-L\_OUT)  
V: 200mV/div. H: 500μsec/div.

- ⑤ CN7605-pin 9 (VD\_IO)  
V: 2V/div. H: 5msec/div.

### AUDIO AMP ASSY

#### • AUDIO

Input: INPUT 1

Signal: 200mVrms, 1 kHz input,  
VOL MAX

- ⑥ CH1: JA7606-pin 13 (HD)  
V: 2V/div. H: 5μsec/div.  
⑦ CH2: JA7606-pin 1 (R)  
V: 500mV/div. H: 5μsec/div.

- ① IC5003-pin 1 (L-AUDIO)  
V: 50mV/div. H: 500μsec/div.

- ② CH1: CN5003-pin 9 (L-)  
V: 2V/div. H: 500μsec/div.  
③ CH2: CN5003-pin 8 (L+)  
V: 2V/div. H: 500μsec/div.

# 50 (43) X DRIVE ASSY, 50 (43) Y DRIVE ASSY and 50 (43) SCAN A ASSY

• 50 (43) X SUS BLOCK, 50 (43) Y LOGIC BLOCK, 50 (43) Y SUS BLOCK

## ① Drive Output Waveform (1 field,color-bar)

CH1: R1226 (XPSUS) - K1201 (SUSGND)  
(50 (43) X DRIVE ASSY)  
CH2: R2348 (YPSUS) - K2301 (SUSGND)  
(50 (43) Y DRIVE ASSY)  
CH3: K3001 (Scan OUT) - K2301 (SUSGND)  
(50 (43) SCAN A ASSY)  
V: 100V/div. H: 2msec/div.

## ② Reset Pulse

CH1: R1226 (XPSUS) - K1201 (SUSGND)  
(50 (43) X DRIVE ASSY)  
CH2: R2348 (YPSUS) - K2301 (SUSGND)  
(50 (43) Y DRIVE ASSY)  
CH3: K3001 (Scan OUT) - K2301 (SUSGND)  
(50 (43) SCAN A ASSY)  
V: 100V/div. H: 100μsec/div.

## ③ Sustain Pulse (1 sub-sub-field)

CH1: R1226 (XPSUS) - K1201 (SUSGND)  
(50 (43) X DRIVE ASSY)  
CH2: R2348 (YPSUS) - K2301 (SUSGND)  
(50 (43) Y DRIVE ASSY)  
CH3: K3001 (Scan OUT) - K2301 (SUSGND)  
(50 (43) SCAN A ASSY)  
V: 50V/div. H: 5μsec/div.

## ④ Sustain Waveform

CH1: R2348 (YPSUS) - K2301 (SUSGND)  
(50 (43) Y DRIVE ASSY)  
V: 50V/div. H: 500nsec/div.

## ⑤ Control Signal (Sustain Waveform Gen.)

CH2: K2016 (YSUS-G) - K2010 (DGND)  
CH3: K2025 (YSUS-U1) - K2010 (DGND)  
CH4: K2022 (YSUS-U2) - K2010 (DGND)  
CH5: K2026 (YSUS-B) - K2010 (DGND)  
CH6: K2024 (YSUS-D2) - K2010 (DGND)  
CH7: K2027 (YSUS-D1) - K2010 (DGND)  
(50 (43) Y DRIVE ASSY)  
V: 1V/div. H: 500nsec/div.

Note:

50 (43) \*\*\* Assy means  
50 \*\*\* Assy or 43 \*\*\* Assy.

## ⑥ Scan Control Signal (1 field, color-bar)

CH2: K2006 (SI) - K2029 (DGND)  
CH3: K2009 (OC1) - K2029 (DGND)  
CH4: K2004 (OC2) - K2029 (DGND)  
CH5: K2007 (CLR) - K2029 (DGND)  
CH6: K2003 (CLK2) - K2029 (DGND)  
CH7: K2008 (LE) - K2029 (DGND)  
(50 (43) Y DRIVE ASSY)  
V: 1V/div. H: 2msec/div.

## ⑦ X Drive Pulse Control Signal (color-bar)

CH1: R1226 (XPSUS) - K2301 (SUSGND)  
V: 100V/div. H: 2msec/div.  
CH2: K1016 (XCP-MSK) - K1020 (DGND)  
CH3: K1015 (XSUS-MSK) - K1020 (DGND)  
CH4: K1014 (XNR-D) - K1020 (DGND)  
V: 1V/div. H: 2msec/div.  
(50 (43) X DRIVE ASSY)

## ⑧ Y Drive Pulse Control Signal (color-bar)

CH1: R2348 (YPSUS) - K2301 (SUSGND)  
V: 50V/div. H: 2msec/div.  
CH2: K2015 (YSUS-MSK) - K2010 (DGND)  
CH3: K2017 (YSOFT-D) - K2010 (DGND)  
CH4: K2023 (YPR-U) - K2010 (DGND)  
V: 1V/div. H: 2msec/div.  
(50 (43) Y DRIVE ASSY)

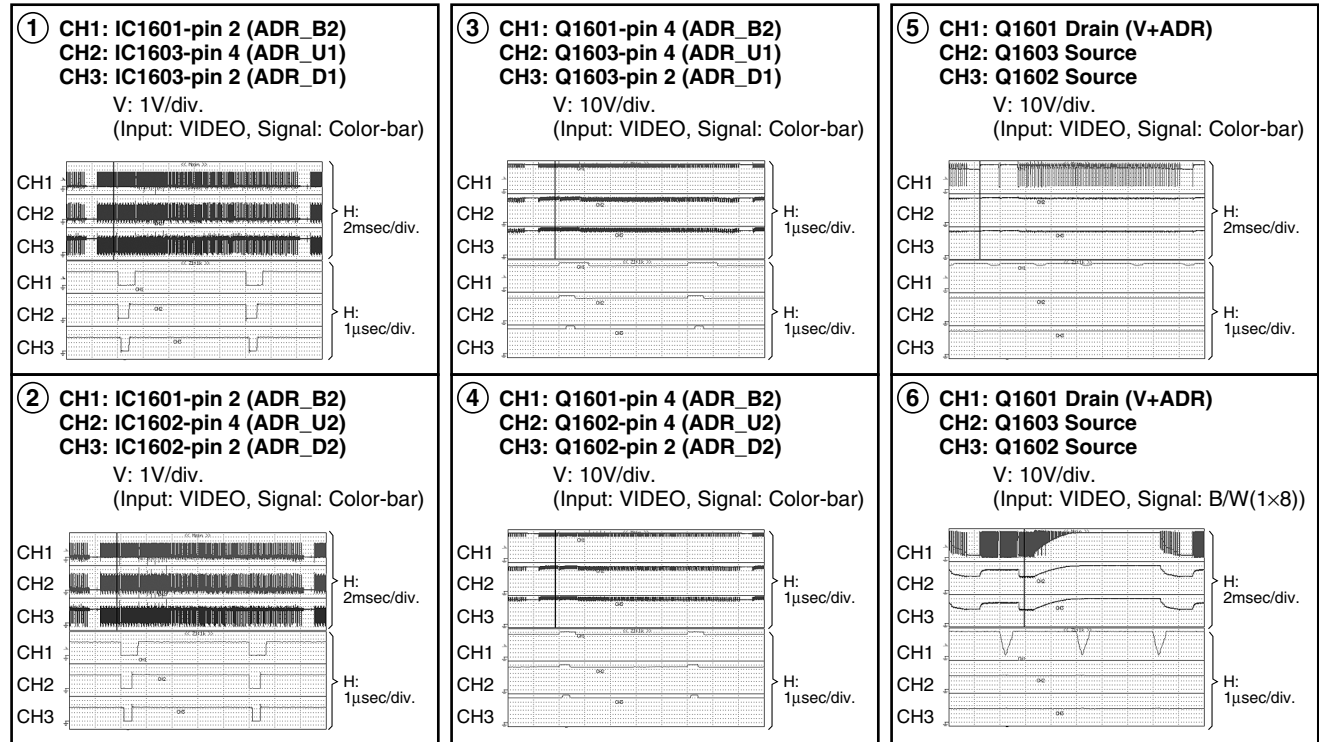

## 50 (43) ADDRESS ASSY

### • ADR RESONANCE BLOCK (VIDEO)

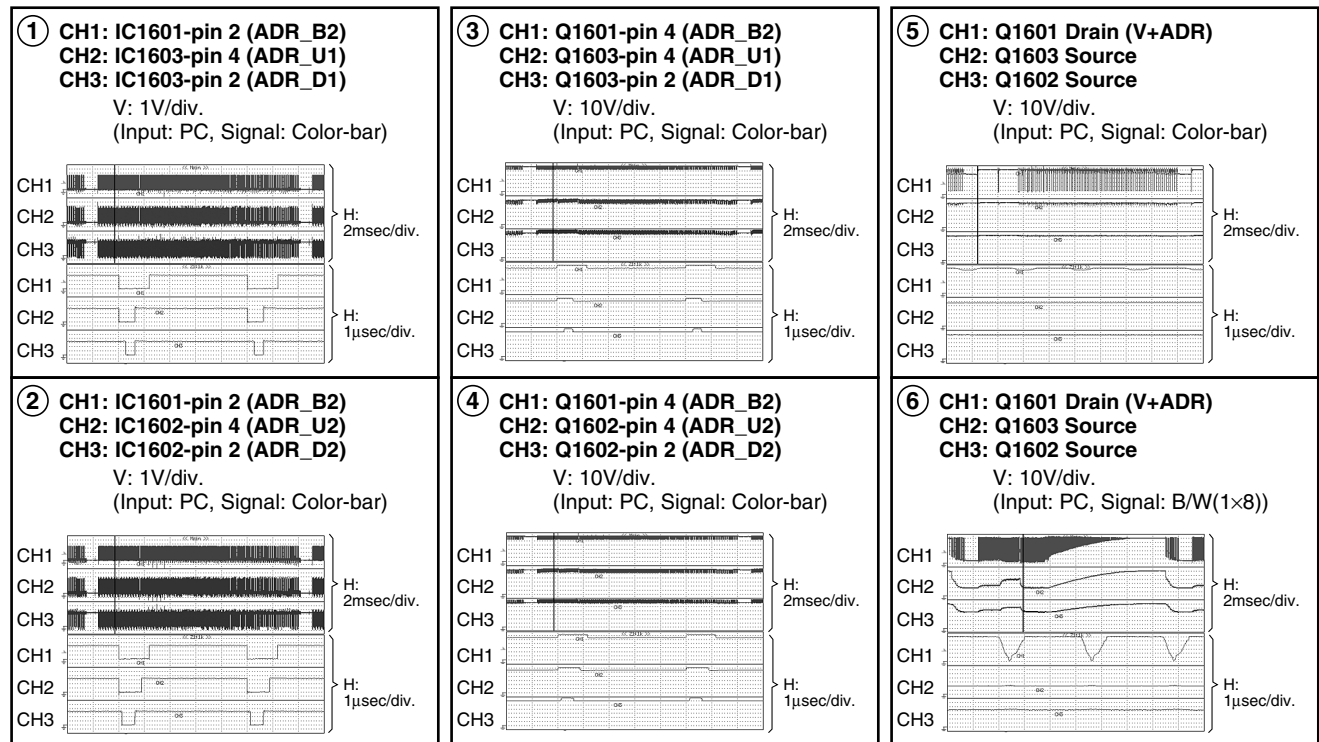

Note:

50 (43) \*\*\* Assy means  
50 \*\*\* Assy or 43 \*\*\* Assy.

## 50 (43) ADDRESS ASSY

### • ADR RESONANCE BLOCK (PC)

## 50 ADDRESS ASSY

### • ADR LOGIC BLOCK

## 43 ADDRESS ASSY

### • ADR LOGIC BLOCK

## 5. PCB PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.

● The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

● When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560  $\Omega$   $\rightarrow$  56 x 10<sup>1</sup>  $\rightarrow$  561 ..... RD1/4PU 561 J  
 47k  $\Omega$   $\rightarrow$  47 x 10<sup>3</sup>  $\rightarrow$  473 ..... RD1/4PU 473 J  
 0.5  $\Omega$   $\rightarrow$  R50 ..... RN2H R50 K  
 1  $\Omega$   $\rightarrow$  1R0 ..... RS1P 1R0 K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k  $\Omega$   $\rightarrow$  562 x 10<sup>1</sup>  $\rightarrow$  5621 ..... RN1/4PC 5621 F

## 6. ADJUSTMENT

1. At shipment, the unit is adjusted to its best conditions. Normally, it is not necessary to readjust even if an assembly is replaced. If the adjustment is shifted or if it becomes necessary to readjust because of part replacement, etc., perform the adjustment as described below.
2. Any value changed in Service/Factory mode will be stored in memory as soon as it is changed. Before readjustment, take note of the original values for reference in case you need to restore the original settings.
3. Use a stable AC power supply.

### 6.1 ADJUSTMENT REQUIRED WHEN THE SET IS REPAIRED OR REPLACED

#### ■ When any of the following assemblies is replaced

POWER SUPPLY Unit

No adjustment required

DIGITAL VIDEO Assy

Copy of backup data requires.

- When adjust with the service factory mode, refer to "10.DIGITAL EEPROM" of "6.2 SERVICE FACTORY MODE."
- When adjust with the command, refer to "7.1.6 BACKUP THE ADJUSTMENT VALUES FOR THE MAIN UNIT."

50 X DRIVE Assy

No adjustment required

50 Y DRIVE Assy

No adjustment required

AV I/O Assy

No adjustment required

RGB Assy

No adjustment required

VIDEO SLOT Assy

No adjustment required

Other assemblies

No adjustment required

Service Panel

Refer to "6.4 METHOD FOR REPLACING THE SERVICE PANEL ASSY."

#### ■ When any part in the following assemblies is replaced

POWER SUPPLY Unit

The assembly must be replaced as a unit, and no part replacement is allowed.

DIGITAL VIDEO Assy

No adjustment required

50 X DRIVE Assy

No adjustment required

50 Y DRIVE Assy

No adjustment required

AV I/O Assy

Replacement and repair of IC6810, IC7610 and IC8705 are impossible.

RGB Assy

Replacement and repair of IC6001, IC6401, IC6403, IC6601, IC6602 and IC7205 are impossible.

VIDEO SLOT Assy

Replacement and repair of IC6107, IC6255, IC6257 and IC7902 are impossible.

Other assemblies

No adjustment required

## 6.2 SERVICE FACTORY MODE

Commands in Service/Factory mode must be issued using the remote control unit supplied with the Plasma Display.

### State Transition Diagram

## 6.3 HOW TO ENTER FACTORY MODE

For adjustments, it is necessary to enter Service/Factory mode. There are two ways to enter Service/Factory mode: by using the remote control unit, or by using RS232C commands from your PC.

### When the unit is in Standby (STB) Mode

- Please refer to the technical document (Service Knowhow)

### When the power is on

No.	Method	Procedures
1	Remote control unit	When the conventional Service/Factory code (AA5F) is sent, the unit will enter Service/Factory mode.
2	PC	Connect your PC via its RS232C port, and send the FAY command.

## ■ Operation when Service/Factory mode is entered

### ● Functions whose settings are set to OFF

The settings of the following functions are set to OFF when Service/Factory mode is entered (including when this mode is entered by receiving the FAY command):

- SPLIT (The display will become that of the main input.) (for PDP-5004, PDP-4304 only)
- MASK CONTROL
- ORBITER

### ● User's setting data

User setting data are set as follows:

- Although user's adjustment data for video/audio adjustment and various adjustment are stored in memory, they are not reflected on the display.
- Although user's adjustment data for SCREEN are stored in memory, SCREEN adjustment data are reset to the default settings.
- Screen size and sound volume reflect user settings.
- The COLOR DECODING and SIGNAL FORMAT settings are reset to the default values.

## ■ Functions of the keys on the remote control unit in Service/Factory mode

SR Function	Main Function	Description
MUTING	Switching main items	For shifting to the next (top) main item
▼ (DOWN)	Switching subitems	For shifting to the next (downward) subitem
▲ (UP)	Switching subitems	For shifting to the previous (upward) subitem
◀ (LEFT)	Increasing adjustment value	For increasing adjustment value
▶ (RIGHT)	Decreasing adjustment value	For decreasing adjustment value
SET	Shifting layers	For shifting to lower or upper layer
INPUT *	Switching inputs	For switching the input to *
STANDBY/ON	POWER OFF	For turning off the power
FACTORY	Service/Factory OFF	For setting Service/Factory mode to OFF
MENU	Service/Factory OFF	For setting Service/Factory mode to OFF
SPLIT	Main screen/Sub screen change	MAIN ↔ SUB (for PDP-5004, PDP-4304 only)

# Main-item indications

A Four parameters are displayed:

## 1 Input function

Input Functions	On-Screen Display
IN1 to IN5	IN1 to IN5

## 2 SIG mode and screen size

Note: See SIG-Mode Tables. (See next page.)

## 3 Color system and signal type

Color System and Signal Type		On-Screen Display
NTSC	Composite input/ S-connector input	NTV/NTS
BLACK/WHITE		BWV/BWS
Y/Cb/Cr, Y/Pb/Pr		CBR
RGB		RGB
Digital video signal		DIG

## 4 Option (Destination, etc.)

Options	On-Screen Display
PDP-5004 / PDP-4304	ASM
PDP-5014 / PDP-4314	ABM

## ● SIG-Mode Table

The signal mode is displayed in three characters:

**First character:** Resolution of the input signal (numerics for the video signals, and alphabets for the PC signals)

**Second character:** Grouping of the vertical frequencies

2nd Character	Reference Vertical Frequency	Area	Remarks
–	–	– 20.0	No signal
B		20.0 to 28.0	
C		28.0 to 45.0	
1	50	45.0 to 54.5	
2	56	54.5 to 58.2	
3	60	58.2 to 63.0	
4	66	63.0 to 68.0	
5	70	68.0 to 73.4	
6	For interpolation of 72-Hz	73.4 to 73.9	For distinguishing between 70-Hz or 75-Hz area
7	75	73.9 to 80.0	
8	85	80.0 to 88.5	
?	–	91.5 –	Out of range

**Third character:** Selection of the screen size by the user is displayed.

(○: available, ×: not available)

3rd Character	Description on GUI	VIDEO	PC
0	DOT BY DOT	×	○
1	4 : 3	○	○
2	FULL	○	○
3	ZOOM	○	×
4	WIDE	○	×
6	CINEMA	○	×

## ● SIG-Mode Table

**SIG-Mode table for video signals**

SIG-Mode	Signal Type	Vertical Freq. fv (Hz)	Horizontal Freq. fh (kHz)	Dot Clock (MHz)	Remarks
13*	SDTV • 480i	60.000	15.734	13.5	
33*	SDTV • 480p	60.000	31.469	27.000	
43*	HDTV • 1080i	60.000	33.750	74.250	
63*	HDTV • 720p	60.000	45.000	74.250	

\*: Represents the current screen-size selected.

SIG-Mode table for PC signals

SIG-Mode	Signal Type	Vertical Freq. fv (Hz)	Horizontal Freq. fh (kHz)	Dot Clock (MHz)	Remarks
A2*	640 × 400	56.422	24.825	21.052	Former 720 × 400
A5*	720 × 400	70.087	31.469	28.322	Former 640 × 400
A8*	720 × 400	85.050	37.861	35.438	New
B1*	640 × 480	49.673	24.688	19.750	640 × 480 For rescan (48/50Hz)
B3*		59.940	31.469	25.175	
B4*		66.666	35.000	30.240	
B6*		72.809	37.861	31.500	
B7*		75.000	37.500	31.500	
B8*		85.000	43.300	36.000	
C1*	848 × 480	49.540	24.621	26.000	848 × 480 For rescan (48/50Hz)
C3*		60.000	31.020	33.750	
D2*	800 × 600	56.250	35.158	36.000	
D3*		60.317	37.879	40.000	
D6*		72.188	48.077	50.000	
D7*		75.000	46.875	49.500	
D8*		85.061	53.674	56.250	
E7*	832 × 624	74.550	49.725	57.283	
F1*	1024 × 768	48.003	38.690	52.000	1024 × 768 For rescan (48/50Hz)
F3*		60.004	48.363	65.000	
F5*		70.069	56.476	75.000	
F7*		75.029	60.023	78.750	
F8*		84.997	68.677	94.500	
G1*	1280 × 768	48.014	38.507	65.000	1280 × 768 For rescan (48/50Hz)
G2*		56.250	45.113	76.150	
G3*		59.870	47.776	79.500	
G5*		69.843	56.014	95.000	
O3*	1280 × 720	59.943	44.718	74.410	

\* : Represents the current screen-size selected.

## INFORMATION mode

Select the main item "INFORMATION" using the MUTE key then select the subitems shown in the table below using the ▲ or ▼ key.

### ● Operation items

No.	Function / Display	Content	232C Command
1	VERSION (1)	The flash memory versions for each device are displayed (1)	GS1
2	VERSION (2)	The type of video card inserted in the slot is displayed:	
3	SERIAL	For displaying the serial number of the product	GNP
4	PANEL PD	Power-down and its time of occurrence are displayed. The values can be cleared.	GPD
5	PANEL SD	Shutdown and its time of occurrence are displayed. The values can be cleared.	GNG
6	TEMPERATURE	Information on temperature is displayed.	GS2
7	HOUR METER	Cumulative power-on time is displayed. The value can be cleared.	GS2
8	PULSE METER	The pulse meter values at each block are displayed. The values can be cleared.	GPM
9	P ON COUNTER	The number of times the power was turned on is displayed. The value can be cleared.	GPC
10	DIGITAL EEPROM	The status of the backup data for the module microcomputer is displayed and updated.	GS2
11	HDMI SIGNAL INFO 1	The status-register data for the HDMI receiver are read out and displayed in hexadecimal notation.	—
12	HDMI SIGNAL INFO 2

The log of the past eight power-downs is displayed. Power-down points (first and second) and the hour meter value when the power-down was generated are displayed, with the latest power-down data at the top.

The meanings of indications for power-down points are shown in the table below.

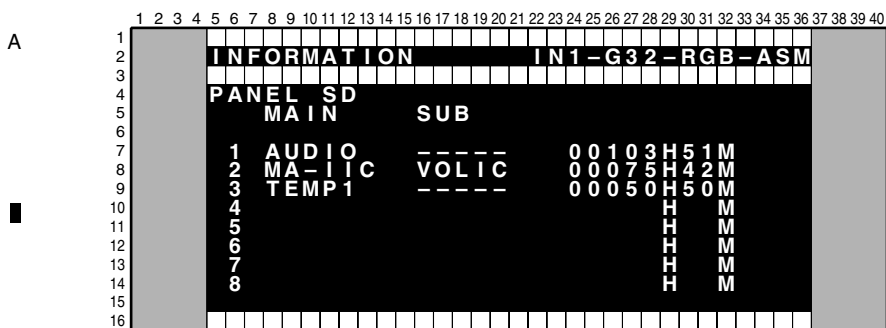

##### • Power-down information

Type of Power-down	On-Screen Display	Type of Power-down	On-Screen Display
No corresponding item	-----	Power-down of the Y-SUS system	Y-SUS
Power-down of the main power supply system	POWER	Power-down of the address system	ADRS
Power-down of the scanning system	SCAN	Power-down of the X-DRIVE circuitry	X-DRV
Power-down in the path between the scanning system and 5-V power supply	SCN-5V	Power-down of the X-DC/DC converter	X-DCDC
Power-down of the Y-Drive system	Y-DRV	Power-down of the X-SUS system	X-SUS
Power-down of the Y-DC/DC converter	Y-DCDC	Power-down of the driving IC power supply system	D-DCDC
PD which cannot be specified	UNKNOWN		

\*1: If an activated protection circuit could not be identified after the power-down, it is treated as an unidentifiable power-down (UNKNOWN).

## 5. PANEL SD

- **Panel shutdown information**

Type of Shutdown	On-Screen Display (MAIN)	Subcategory
Abnormality in IC4 communication	IC4	
Abnormality in module microcomputer IIC communication	MD-IIC	Exists.
DIGITAL-DCDC power decrease	RST2	
Abnormality in panel temperature	TEMP1	
Short-circuiting of the speakers	AUDIO	
Abnormality in module microcomputer communication	MODULE	
Abnormality in three-wire serial communication of the main microcomputer	MA-SRL	Exists.
Abnormality in main microcomputer IIC communication	MA-IIC	Exists.
Abnormality in main microcomputer communication	MAIN	
FAN stopped	FAN	
Abnormality in unit temperature	TEMP	Exists.
Abnormality in the ASIC power on the main microcomputer side	M-DCDC	
Other failures	ETC	Exists.

- **Subcategory information**

Type of Shutdown	Subcategory
MD-IIC	EEPROM4K, EROM2K
MA-SRL	IF microcomputer, IC2 (IC7004)(IC8702), IC3 (IC7101)
MA-IIC	MA-EEP (IC7205), IC1-V (IC6107), IC1-Y (IC6255), AD-M (IC6001), AD-S (IC6602), SL-EEP (IC6257), IC6/1 (IC5701), IC6/2 (IC5801), VOLIC (IC7603), HDMI 2 (IC6810)
TEMP	INSIDE/AIR (INSIDE = TEMP2/AIR =TEMP3)
ETC	VCC-D1, VCC-D2, VCC-D4 (IC6809)

## 10. DIGITAL EEPROM

When the DIGITAL VIDEO Assy is to be replaced, the adjustment values in it are temporarily stored in the backup ROM then are written on the new Assy after replacement.

- ① Check if adjustment has been made on the DIGITAL VIDEO Assy or not (i.e., in the state of a new service part), and if the data on any adjustment values are retained in the backup ROM or not.

- ADJUST: OK (DIGITAL VIDEO Assy adjusted)  
NG (DIGITAL VIDEO Assy not adjusted)
- BACKUP: OK (Adjustment data retained in the backup ROM)  
NG (Adjustment data not retained in the backup ROM)

- ② Downloading the data for the DIGITAL VIDEO Assy from the backup ROM

- Press the SET key while display ① above is displayed, and the following display will appear.

- Move the cursor to YES and press the SET key.  
The data in the backup ROM are copy to the DIGITAL VIDEO Assy.  
(When a new DIGITAL VIDEO Assy has been mounted, it now has the adjustment data suited for the panel.)
- Move the cursor to NO, and press the SET key.  
Copy of the data to the DIGITAL VIDEO Assy will not be executed.

- ③ Clearing the data in the ROM of the DIGITAL VIDEO Assy

- When YES or NO is selected while display ② above is displayed, the following display will appear.

- Move the cursor to YES and press the SET key.  
The data in the ROM of the DIGITAL VIDEO Assy are cleared, and the Assy has no specific adjustment data.
- Move the cursor to NO and press the SET key. The data in the ROM of the DIGITAL VIDEO Assy are not cleared.  
When YES selected on display ② and the data were copy, select NO on this display.

**Note:** When YES or NO is selected on display ③ above, the display returns to that of ① above.

## 11. HDMI SIGNAL INFO 1

## Adjustment of corresponding route unevenness

Basically, only replacement of service parts is required, and adjustment is not required.

No.	Command	Adjustment Parameter Name in Factory	Function
1	VSG	CVY GAIN	IC1 MAIN GAIN adjustment (switching routes with the SWM [main] and SWS [sub] commands)
2	VSO	CVY OFFSET	IC1 MAIN OFFSET adjustment (switching routes with the SWM [main] and SWS [sub] commands)
3	RYG	RY GAIN	AD R GAIN adjustment (correction in differences between component- and RGB-system signals)
4	GYG	GY GAIN	AD G GAIN adjustment (correction in differences between component- and RGB-system signals)
5	BYG	BY GAIN	AD B GAIN adjustment (correction in differences between component- and RGB-system signals)
6	ADC	AD MAIN CONTRAST	AD MAIN RGB GAIN adjustment (for main screen)
7	MRG	AD MAIN R GAIN	AD MAIN R GAIN adjustment (for main screen)
8	MGG	AD MAIN G GAIN	AD MAIN G GAIN adjustment (for main screen)
9	MBG	AD MAIN B GAIN	AD MAIN B GAIN adjustment (for main screen)
10	MRO	AD MAIN R OFFSET	AD MAIN R OFFSET adjustment (for main screen)
11	MGO	AD MAIN G OFFSET	AD MAIN G OFFSET adjustment (for main screen)
12	MBO	AD MAIN B OFFSET	AD MAIN B OFFSET adjustment (for main screen)
13	SRG	AD SUB R GAIN	AD SUB R GAIN adjustment (for sub screen)
14	SGG	AD SUB G GAIN	AD SUB G GAIN adjustment (for sub screen)
15	SBG	AD SUB B GAIN	AD SUB B GAIN adjustment (for sub screen)
16	SRO	AD SUB R OFFSET	AD SUB R OFFSET adjustment (for sub screen)
17	SGO	AD SUB G OFFSET	AD SUB G OFFSET adjustment (for sub screen)
18	SBO	AD SUB B OFFSET	AD SUB B OFFSET adjustment (for sub screen)

## Reference: Commands for adjustment of differences in signals and memory cells used for storing adjustment values

- Basically no adjustment is required for the Service Assy, as it is properly adjusted before shipment.

### Adjustment values to be stored in the EEPROM of the AV I/O (INDIVIDUAL mode)

Adjustment values differ depending on the input function, input signal format, and main/sub screen.

Input and Signal Format	Commands for Adjustment	
	Route for the Main Screen	Route for the Sub Screen
INPUT1 (RGB)	RYG GYG BYG	RYG GYG BYG
INPUT1 (Color difference)	RYG GYG BYG	RYG GYG BYG

- Four adjustment tables are provided here, depending on the input function, input signal format, and main/sub screen.
- No adjustment is required for INPUT 2, which is of HDMI (digital video interface) standards.

### Adjustment values to be stored in the EEPROM of the VIDEO SLOT 2 Assy

Adjustment values differ depending on the input function and main/sub screen.

Input and Signal Format	Commands for Adjustment	
	Route for the Main Screen	Route for the Sub Screen
INPUT3 (Y/C)	VSG VSO	RYG GYG BYG
INPUT4 (Comp. V)	VSG VSO	RYG GYG BYG
INPUT5 (RGB)	RYG GYG BYG	RYG GYG BYG
INPUT5 (Color difference)	RYG GYG BYG	RYG GYG BYG

- Eight adjustment tables are provided here, depending on the input function and main/sub screen.

### Adjustment values to be stored in the EEPROM of the RGB (COMMON mode)

Adjustment values differ depending on the signal resolution, input signal format, and main/sub screen.

**Note:** No adjustment is required for HDMI input or signals converted to digital signals by IC1.

#### [Main adjustment 1]

Main A/D adjustments for R, G, and B individually (COMMON-RGB mode)

Input and Signal Format	Commands for Adjustment		Conditions for the Tables to be Switched
480i (RGB)	MRG MGG MBG	MRO MGO MBO	Video RGB signals
480i (Color difference)	MRG MGG MBG	MRO MGO MBO	Video color-difference signals
VGA (RGB)	MRG MGG MBG	MRO MGO MBO	PC signals (640x400 - 832x624)
XGA (RGB)	MRG MGG MBG	MRO MGO MBO	PC signals (1024x768 - 1280x768)

- To adjust the video signals, input corresponding signals to INPUT 5 to change the RGB/color-difference signal setting then perform adjustment.
- To adjust the PC signal, input a signal to INPUT 1. Make sure that the SIGNAL FORMAT setting is correctly made. Then adjust the signal.
- Four adjustment tables are provided here, depending on the signal resolution, input signal format, and main/sub screen.

#### [Sub adjustment 1]

Main A/D adjustments for R, G, and B individually (COMMON-RGB 1 mode)

Input and Signal Format	Commands for Adjustment		Conditions for the Tables to be Switched
RGB	SRG SGG SBG	SRO SGO SBO	All R, G, and B signals
Color difference	SRG SGG SBG	SRO SGO SBO	All color-difference signals

- For adjustment according to the above tables, input video signals to INPUT 5 to switch to the route for sub input and to change the RGB/color-difference signal setting then perform adjustment.
- Two adjustment tables are provided here, depending on the signal format.

#### [Main adjustment 2]

Main A/D adjustments for all R, G, and B simultaneously (COMMON-RGB 2 mode)

Input and Signal Format	Commands for Adjustment	Conditions for the Tables to be Switched
RGB	ADC	All R, G, and B signals
Color difference	ADC	All color-difference signals

- For adjustment according to the above tables, input video signals to INPUT 5 to switch to the route for main input and to change the RGB/color-difference signal setting then perform adjustment.
- A contrast gain commits this adjustment command simultaneously three colors.
- Two adjustment tables are provided here, depending on the signal format.

## INDIVIDUAL ADJ. mode

A

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40

12																																											
13																																											
14																																											
15																																											
16																																											
					CVY GAIN<=> : 128																																						

B

Each time the ▲ or ▼ key is pressed, the individual adjustment items are changed, as follows:

No.	Corresponding 232C Command	Function/Display	Content	Adjustable Range	Remarks
1	VSG	CVY GAIN<=> : ***	MICHAEL (IC6255) input GAIN adj.	064 to 191	Select a route with the command SWM (main) and the command SWS (sub).
2	VSO	CVY OFFSET<=> : ***	MICHAEL (IC6255) input OFFSET adj.	064 to 191	
3	RYG	RY GAIN<=> : ***	AD (IC6001 or IC6602) R input GAIN adj.	000 to 255	The memory tables for the RGB and component systems are separate, and are switchable with the command MCD.
4	GYG	GY GAIN<=> : ***	AD (IC6001 or IC6602) G input GAIN adj.	000 to 255	
5	BYG	BY GAIN<=> : ***	AD (IC6001 or IC6602) B input GAIN adj.	000 to 255	

"\*\*\*" in the table above represents the adjustment value.

The value of each subitem can be changed using the ◀ or ▶ key.

C

**Notes:**

- The differences in signals for the main and sublevel screens from the AV I/O Assy are compensated, and the compensation data are stored in the EEPROM (IC8705) for each screen.
- No adjustment required normally.

## COMMON ADJ. mode

D

[illegible]

Each time the ▲ or ▼ key is pressed, the subitems are changed, as follows:

- RGB1(+) : Adjustment of the VIDEO SLOT 2 Assy and the RGB Assy
- RGB2(+) : Adjustment of the RGB Assy
- PANEL1(+) : Adjustment items related to the drive (common to the unit)
- PANEL2(+) : Adjustment items related to the drive (dependent on signals)

Each time the SET key is pressed, items grouped under the subitem are selected one by one.

E

F

FUNCTION CHECK mode

Each time the ▲ or ▼ key is pressed, the individual adjustment items are changed, as follows:

No.	Display	Function
1	IC1 TEST<=> :	(Not used)
2	IC2 TEST<=> :	(Not used)
3	IC3 TEST<=> :	(Not used)
4	IC4 TEST<=> :	(Not used)
5	FAN<=> :***	The rotation speed of the fan is forcibly switched. (*)

- Note (\*)**:
- The operation of the fan can be checked by setting FAN to MAX.
  - Set to CNT normally.

## 1. COMMON-RGB1

A

[illegible]

Each time the ▲ or ▼ key is pressed, the subitems are changed, as follows:

B

### When the main input is selected

No.	Corresponding 232C Command	Function/Display	Content	Adjustable Range	Remarks
1	MRG	AD MAIN R GAIN <=> : ***	AD (IC6001) MAIN R GAIN adj. (for main screen)	000 to 255	
2	MGG	AD MAIN G GAIN <=> : ***	AD (IC6001) MAIN G GAIN adj. (for main screen)	000 to 255	
3	MBG	AD MAIN B GAIN <=> : ***	AD (IC6001) MAIN B GAIN adj. (for main screen)	000 to 255	
4	MRO	AD MAIN R OFFSET <=> : ***	AD (IC6001) MAIN R OFFSET adj. (for main screen)	000 to 255	
5	MGO	AD MAIN G OFFSET <=> : ***	AD (IC6001) MAIN G OFFSET adj. (for main screen)	000 to 255	
6	MBO	AD MAIN B OFFSET <=> : ***	AD (IC6001) MAIN B OFFSET adj. (for main screen)	000 to 255	

C

### When the sub input is selected

No.	Corresponding 232C Command	Function/Display	Content	Adjustable Range	Remarks
1	SRG	AD SUB R GAIN   <=>   : ***	AD (IC6602) SUB R GAIN adj. (for sub screen)	000 to 255	
2	SGG	AD SUB G GAIN   <=>   : ***	AD (IC6602) SUB G GAIN adj. (for sub screen)	000 to 255	
3	SBG	AD SUB B GAIN   <=>   : ***	AD (IC6602) SUB B GAIN adj. (for sub screen)	000 to 255	
4	SRO	AD SUB R OFFSET <=>   : ***	AD (IC6602) SUB R OFFSET adj. (for sub screen)	064 to 191	
5	SGO	AD SUB G OFFSET <=>   : ***	AD (IC6602) SUB G OFFSET adj. (for sub screen)	064 to 191	
6	SBO	AD SUB B OFFSET <=>   : ***	AD (IC6602) SUB B OFFSET adj. (for sub screen)	064 to 191	

\*\*\*" in the table above represents the adjustment value.

The value of each subitem can be changed using the ◀ or ▶ key.

D

**Notes:**

- The differences in signals for the main and sublevel screens from the RGB Assy are compensated, and the compensation data are stored in the EEPROM (IC7205) for each screen.
- No adjustment required normally.

## 2. COMMON-RGB 2

E

[illegible]

No.	Corresponding 232C Command	Function/Display	Content	Adjustable range	Remarks
1	ADC	AD MAIN CONTRAST<=> : ***	AD (IC6001) MAIN RGB GAIN adj. (for main screen)	000 to 255	

\*\*\*" in the table above represents the adjustment value.

The value of each subitem can be changed using the ◀ or ▶ key.

F

**Note:** No adjustment required normally.

### 3. COMMON-PANEL1

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40

10																																							
11																																							
12																																							
13																																							
14																																							
15																																							
16																																							

Each time the ▲ or ▼ key is pressed, the subitems are changed, as follows:

No.	Corresponding 232C Command	Function/Display	Content	Adjustable Range
1	XU1	X-SUS U1 <=> : ***	Adjustment of X-SUS leading edge pulse U1	124 to 132
2	XU2	X-SUS U2 <=> : ***	Adjustment of X-SUS leading edge pulse U2	124 to 132
3	XD1	X-SUS D1 <=> : ***	Adjustment of X-SUS trailing edge pulse D1	124 to 132
4	XD2	X-SUS D2 <=> : ***	Adjustment of X-SUS trailing edge pulse D2	124 to 132
5	YU1	Y-SUS U1 <=> : ***	Adjustment of Y-SUS leading edge pulse U1	124 to 132
6	YU2	Y-SUS U2 <=> : ***	Adjustment of Y-SUS leading edge pulse U2	124 to 132
7	YD1	Y-SUS D1 <=> : ***	Adjustment of Y-SUS trailing edge pulse D1	124 to 132
8	YD2	Y-SUS D2 <=> : ***	Adjustment of Y-SUS trailing edge pulse D2	124 to 132
9	YD3	Y-SUS D3 <=> : ***	Adjustment of X-SUS trailing edge pulse D3	124 to 132
10	YD4	Y-SUS D4 <=> : ***	Adjustment of X-SUS trailing edge pulse D4	124 to 132
11	VSU	VLT-SUS <=> : ***	SUS voltage adjustment	000 to 255
12	VOF	VLT-OFS <=> : ***	OFFSET voltage adjustment	000 to 255

"\*\*\*" in the table above represents the adjustment value.

The value of each subitem can be changed using the ◀ or ▶ key.

#### Notes:

- Adjustments No. 1 to No. 10 above are not normally required, unless so instructed by Service Information, etc.
- Readjustment of values for No. 11 [VSU] and No. 12 [VOF] are required when the service panel is replaced.

#### 4. COMMON-PANEL2

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40

8																																							
9																																							
10																																							
11																																							
12																																							
13																																							
14																																							
15																																							
16																																							

Each time the ▲ or ▼ key is pressed, the subitems are changed, as follows:

No.	Corresponding 232C Command	Function/Display	Content	Adjustable Range
1	PRH	PANEL R HIGH <=> : *** (PTO)	Panel W/B R-HIGH adjustment	000 to 511
2	PGH	PANEL G HIGH <=> : *** (PTO)	Panel W/B G-HIGH adjustment	000 to 511
3	PBH	PANEL B HIGH <=> : *** (PTO)	Panel W/B B-HIGH adjustment	000 to 511
4	PRL	PANEL R LOW <=> : *** (PTO)	Panel W/B R-LOW adjustment	000 to 999
5	PGL	PANEL G LOW <=> : *** (PTO)	Panel W/B G-LOW adjustment	000 to 999
6	PBL	PANEL B LOW <=> : *** (PTO)	Panel W/B B-LOW adjustment	000 to 999
7	ABL	ABL LEVEL <=> : *** (ABx)	Power consumption adjustment	000 to 999

"\*\*\*" in the table above represents the adjustment value.

The value of each subitem can be changed using the ◀ or ▶ key.

White balance adjustment.(From No.1 to No.6). (Refer to 116 pages of the " [W/B-adjustment procedurs]" )

**Notes:** Adjustments No. 7: [ABL] above are not normally required, unless so instructed by Service Information, etc.

"(PTO)" and "(ABx)" in the table above represent the following:

**Note:** No adjustment required normally.

Indication	Table
PT1	For PC and NTSC

Indication	Table
AB1	For 60Hz, 72Hz and 75Hz video
AB3	For PC

#### OPTION mode

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40

9																																							
10																																							
11																																							
12																																							
13																																							
14																																							
15																																							
16																																							

Select the main item "OPTION" using the MUTE key then select the subitems shown in the table below using the ▲ or ▼ key.

No.	Function/Display	Content	Remarks
1	PATTERN MASK (+)	For selecting Pattern mask of IC4	A lower layer exists.
2	FULL MASK (+)	For selecting raster mask of IC4	A lower layer exists.
3	DYNAMIC RANGE	ON ⇔ OFF	The last setting is not stored in memory (initial setting: ON).
4	EDID WRITE MODE	DISABLE ⇔ ENABLE	The last setting is not stored in memory (initial setting: DISABLE).

**Note:**

- For PATTERN MASK (+) and FULL MASK (+), press the SET key to switch to the lower layer.
- Adjustments No. 3 and 4 are not required for servicing.

## 1. PATTERN MASK

## 2. FULL MASK

To select the mask frequency, use the ◀ or ▶ key.

To select the mask pattern, use the ▲ or ▼ key.

### Mask Frequency

No.	Corresponding RS-232C Command	Function/ Display	Content
1	F48	V48	Video 48-Hz sequence
2	F50	V50	Video 50-Hz sequence
3	F60	V60 (initial value)	Video 60-Hz sequence
4	F61	P60	PC 60-Hz sequence
5	F70	P70	PC 70-Hz sequence
6	F72	V72	Video 72-Hz sequence
7	F75	V75	Video 75-Hz sequence

### Pattern Mask

No.	Corresponding RS-232C Command	Function/ Display	Content
1	M00	OFF	Mask mode: OFF
2	M01	01	White 0 to 100%
3	M02	02	Aging mask
4	M03	03	Aging mask (detection of still picture: OFF)
5	M10	10	H RAMP1
6	M11	11	H RAMP2
7	M12	12	H RAMP3
8	M13	13	H RAMP4
9	M14	14	V RAMP
10	M15	15	H/V RAMP
11	M20	20	Window0
12	M21	21	Window1
13	M22	22	Window2
14	M23	23	Window3
15	M24	24	Window4
16	M25	25	Window5
17	M26	26	Window6
18	M27	27	Window7
19	M28	28	Window8
20	M29	29	Window9
21	M2E	2E	Wiper for erasing afterimage
22	M30	30	COLOR BAR
23	M31	31	Slanted lines

**Full Mask**

No.	Corresponding RS-232C Command	Function/ Display	Content
1	M00	OFF	Mask mode: OFF
2	M51	51	Raster – White
3	M52	52	Raster – Red
4	M53	53	Raster – Green
5	M54	54	Raster – Blue
6	M55	55	Raster – Black
7	M56	56	Raster – Cyan
8	M57	57	Raster – Mazenta
9	M58	58	Raster – Yellow
10	M59	59	Raster – Cyan 274
11	M60	60	Raster – 50 fresh color
12	M61	61	Raster – 50 purple
13	M62	62	Raster – 50 sky blue
14	M63	63	Raster – Red 779
15	M64	64	Raster – Cyan 218
16	M65	65	Raster – Cyan 448
17	M66	66	Raster – 43 fresh color
18	M67	67	Raster – Red 640
19	M68	68	Raster – Mazenta 98
20	M69	69	Raster – 43 sky blue 1
21	M70	70	Raster – 43 sky blue 2
22	M71	71	Raster – 43 purple
23	M72	72	Raster – Blue 960
24	M73	73	Raster – Yellow 512
25	M74	74	Raster – Gray 512

**3. DYNAMIC RANGE**

The setting can be changed using the ◀ or ▶ key.

No.	Corresponding RS-232C Command	Function/ Display	Content
1	DYY	ON	DYNAMIC RANGE correction: ON (initial setting)
2	DYN	OFF	DYNAMIC RANGE correction: OFF

**4. EDID WRITE MODE**

The setting can be changed using the ◀ or ▶ key.

No.	Corresponding RS-232C Command	Function/ Display	Content
1	EWN	DISABLE	Prohibiting writing EDID data (initial setting)
2	EWY	ENABLE	Enabling writing EDID data

## INITIALIZE mode

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	
1	INITIALIZE															IN1-G32-RGB-ASM																								
2																																								
3																																								
4																																								
5																																								
6																																								
7																																								
8																																								
9																																								
10																																								
11																																								
12																																								
13																																								
14																																								
15	SYNC DET (+)																																							
16																																								

The subitems can be changed using the ▲ or ▼ key.

No.	Corresponding RS-232C Command	Function/Display	Content
1	—	SYNC DET (+) *1	Setting of the sync signal detection (correspond individually)
2	—	DRIVE MODE (+)	Setting of the luminescence pulse number of the lowest level (correspond individually)
3	—	SIDE MASK LEVEL (+)	Setting of the side mask color (correspond individually)
4	—	PANEL REVISE (+)	(Not used)
5	FST	FINAL SETUP	For initializing user's settings and some factory settings
6	—	C TEMP LOW (+)	For adjusting the user's C TEMP MODE item selected
7	—	C TEMP MID LOW (+)	
8	—	C TEMP MID (+)	
9	—	C TEMP MID HIGH (+)	
10	—	C TEMP HIGH (+)	
11	—	HDMI INTR POSITION (+)	(Not used)

**Note:** Any item followed by (+) has a lower layer to which you can switch using the SET key.

\*1: SYNC DET

Setting	Function	Details
STANDARD	Normal setting	The judgment of synchronization is automatically performed, followed by appropriate image processing.
NON-STD1	LD STILL detection OFF	If the LD STILL operation is performed during setting, the image on the screen is horizontally blurred.
NON-STD2	The judgment of synchronization is set to Nonstandard.	Not the 3-D Y/C processing but the 3-line Y/C processing is performed.

## 1. FINAL SETUP

A

B

Select YES or NO using the ◀ or ▶ key then press the SET key for finalizing the selection:

YES : For executing FINAL SETUP

NO : For not executing FINAL SETUP

In FINAL SETUP, the following items can be initialized:

C

	Item (operation)	Factory setting	Remarks
Normal	Input function (main)	INPUT1	
	Input function (sub)	INPUT2	Only PDP-5004 and PDP-4304 are set.
	Screen size	VIDEO WIDE or FULL PC DOT BY DOT or FULL or 4:3	The screen-size setting will be one of the factory-preset values, based on the results of signal-type detection (SIG-MODE).
	Volume	0	
	Multi screen	OFF	
	AV SELECTION	DYNAMIC (at VIDEO), STANDARD (at PC)	
Menu setting	PICTURE	Default setting for all adjustment items	For each input function
	SCREEN	Default setting for all adjustment items	For each input function
	SET UP	Default setting for all adjustment items	For each input function
	OPTION	Default setting for all adjustment items	For each input function
Factory	PATTERN MASK	OFF	
	FULL MASK	OFF	
	EDIT WRITE MODE	DISABLE	
	PEAK LIMITER	—	

D

E

F

## 2. C TEMP

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40

10																																									
11																																									
12																																									
13																																									
14																																									
15																																									
16																																									

The indication on the 2nd line in the above display varies according to the subitem selected in the upper layer, as follows:

INIT-CT- \*\*\*\*  
\*\*\*\*: LOW/MID/HIGH

**Notes:** Adjustments are not normally required, unless so instructed by Service Information, etc.

Each time the ▲ or ▼ key is pressed, items grouped under the subitems are changed, as follows:

No.	Function/Display	Content
1	R HIGH <=>	For adjusting R highlight in the selected color temperature mode
2	G HIGH <=>	For adjusting G highlight in the selected color temperature mode
3	B HIGH <=>	For adjusting B highlight in the selected color temperature mode
4	R LOW <=>	For adjusting R lowlight in the selected color temperature mode
5	G LOW <=>	For adjusting G lowlight in the selected color temperature mode
6	B LOW <=>	For adjusting B lowlight in the selected color temperature mode

To change the value of each item, press the ◀ or ▶ key.

### About GET Command

#### ● Operation description of GET command

#### ■ Conditions under which GET commands are enabled

Most of the GET commands are enabled at any time, regardless of unit's being on/off or in Factory or Normal mode. However, some GET commands must be issued while the power is on to acquire correct data.

#### GDI: GET STATUS

Data						Size		
		PDP-5004	PDP-4304	PDP-5014	PDP-4314			
1	Resolution	[5]: 1280*768	[4]: 1024*768	[5]: 1280*768	[4]: 1024*768	1 Byte		
2	Age type	[4]: 2004 year				1 Byte		
3	Destination	[A]: America				1 Byte		
4	Grade	[S]: Step up		[B]: Basic		1 Byte		
5	Configuration	[M]: Monitor				1 Byte		
6	Dummy	[2]				1 Byte		
7	Spare	[* *]				2 Byte		

#### GS1: Returning information on the model and the version of the software

Order	Data	Size
1	Data on the display	3 byte
2	Version of the module microcomputer	4 byte
3	Version of the IC4-MANTA	4 byte
4	Sequence version (43VIDEO)	4 byte
5	Sequence version (43PC)	4 byte
6	Sequence version (50VIDEO)	4 byte
7	Sequence version (50PC)	4 byte
8	Version of the IF microcomputer	4 byte
9	Version of the main microcomputer	4 byte
10	Version of the IC3-MANTA	4 byte
11	Version of the OSD	4 byte
12	Dummy	12 byte

#### Breakdown of the data on the display

Data	Model
MX5	PDP-5004 / PDP-5014
MX4	PDP-4304 / PDP-4314

# GPW: RGB-level-related adjustment values of the panel system

Order	Data	Size
1	Panel W/B table currently used	3 byte
2	Main contrast	4 byte
3	Red high light of the W/B adjustment value	4 byte
4	Green high light of the W/B adjustment value	4 byte
5	Blue high light of the W/B adjustment value	4 byte
6	Main brightness	4 byte
7	Red low light of the W/B adjustment value	4 byte
8	Green low light of the W/B adjustment value	4 byte
9	Blue low light of the W/B adjustment value	4 byte

AB3	ABL table for PC

## LIST OF RS-232C COMMAND

Command		Operation	Validity of Direct Numeric Input	Lower limit	Upper limit
[A]			○	000	255
ABL		Adjusting power consumption			
ADC		AD MAIN CONTRAST adjustment			
AMT	S00	Cancelling the audio mute			
AMT	S01	Executing the audio mute			
AST		Executing the auto setup			
[B]					
BCP		Transmitting the backup data to the DIGITAL VIDEO Assy			
BSL		Adjusting the side mask B	○	000	255
BYG		Adjusting the BY GAIN	○	000	255
[C]					
CHM		Clearing the hour meter			
CNG		Clearing the MR NG information			
CPC		Clearing the power-on counter			
CPD		Clearing the power-down information			
CPM		Clearing the pulse meter			
CTM		Clearing the remodeling log			
[D]					
DRF		Turning off the power for the drive system			
DRN		Turning on the power for the drive system			
DW0		Decreasing the adjustment value by 10			
DWn		Decreasing the adjustment value by n			
DWF		Minimizing the adjustment value			
DYR	S00	D-range correction NO			
DYR	S01	D-range correction YES			
[E]					
EDW	S00	Prohibiting the writing of EDID data			
EDW	S01	Permitting the writing of EDID data			
[F]					
F48		Video 48-Hz sequence			
F50		Video 50-Hz sequence			
F60		Video 60-Hz sequence			
F61		PC 60-Hz sequence			
F70		PC 70-Hz sequence			
F72		Video 72-Hz sequence			
F75		Video 75-Hz sequence			
FAJ		Determining the main unit adjustment			
FAN		Turning the Service Factory mode off			
FAY		Turning the Service Factory mode on			
FCA		Turning the fan roll control to auto			
FCM		Maximizing the fan roll control			
FST		Executing the FINAL SETUP			
[G]					
GAJ		Obtaining the adjustment values for the panel			
GAS		Obtaining the IC4 status			
GDI		Command for obtaining the command			
GMM		Switching the gamma	○	000	007
GNG		Obtaining the shut down (NG) information			
GNP		Obtaining the serial number of the panel			
GPC		Obtaining the value of P ON COUNTER			

Command		Operation	Validity of Direct Numeric Input	Lower limit	Upper limit
GPD		Obtaining the power-down information			
GPM		Obtaining the PULSE METER data			
GPP		Obtaining the PD polling log for module			
GPW		Obtaining the PANEL W/B data			
GS1		Obtaining the version data for each device			
GS2		Obtaining the each operating information			
GSL		Adjusting the side mask GREEN	○	000	255
GYG		Adjusting the GY GAIN	○	000	255
[I]					
INP		Indicating the input function of current main screen			
INP	S01	Switching the main screen to Input 1			
INP	S02	Switching the main screen to Input 2			
INP	S03	Switching the main screen to Input 3			
INP	S04	Switching the main screen to Input 4			
INP	S05	Switching the main screen to Input 5			
[M]					
MSK	S00	Mask mode: OFF			
MSK	S01	White: 0 to 100%			
MSK	S02	Aging mask (detection of still picture: OFF)			
MSK	S03	Aging mask			
MSK	S04	Aging mask (detection of still picture: OFF)			
MSK	S10	RAMP slant 1

F

## • Identification of locations having abnormality by the number of times the LEDs flash

### ■ On Shutdown and power-down

#### Shutdown

- Operation: When the microcomputer detects any abnormality, it forcibly shuts the unit off.
- LED indication: The LED flashes in green.

**Note: The LED flashes regardless of the FRONT INDICATOR setting on the Integrator menu.**

#### Power-down

- Operation: When the unit is in emergency status, a protection circuit is activated, and the power is shut off.
- LED indication: The LED flashes in red.

Category	LED		Content	Unit's Operation	Warning Message
	STB	ON			
SD		Once	Communication failure of the panel-drive IC	Shutdown 3 seconds after warning	Shutdown by circuit failure (01)
		Twice	Communication failure of the module IIC	Shutdown 3 seconds after warning	Shutdown by circuit failure (02)
		3 times	Power decrease of the digital DC-DC converter	Immediate shutdown	
		4 times	Panel having high temperature	Shutdown 30 seconds after warning	Shutdown by warning temperature rise (04)
		5 times	Audio failure	Shutdown 3 seconds after warning	Shutdown by warning speaker failure (05)
		6 times	Communication failure of the module microcomputer	Shutdown 3 seconds after warning	Shutdown by circuit failure (06)
		7 times	Main 3-wire serial communication in failure	Shutdown 3 seconds after warning	Shutdown by circuit failure (07)
		8 times	Communication failure of the main IIC	Shutdown 3 seconds after warning	Shutdown by circuit failure (08)

\* If the unit cannot identify which protection circuit was activated, even if a power-down had been detected, the red LED may flash 15 times.

## • Block diagram of the shutdown signal system

### Note:

The figures ① - ⑮ indicate the number of times the LED flashes when shutdown occurs in the corresponding route.

## • Diagnosis of shutdown

SD Circuit in Operation		Defective Assy	Reason for Shutdown	Point to be Checked	Possible Defective Part	Remarks
1	Communication failure of the panel-drive IC	DIGITAL VIDEO	Communication failure of IC4 or defective peripheral circuits	IC4 Block, Panel Flash Block	IC5401, IC5305	
			Writing failure of IC4			After turning the unit on again, check if the data on the version can be read with the GST command.
2	Communication failure of the module IC (Check the shutdown subcategory on the Factory menu.)	DIGITAL VIDEO	Communication failure of the EEPROM (4k) or defective peripheral circuits	Module Ucom Block	IC5206	
		RGB	Communication failure of the EEPROM (2k) or defective peripheral circuits	IC3 Block	IC7102	
			Defective 114-pin FPC	CN400(D15) - CN7101(R10)	ADY1081	Check if the cable is disconnected or not securely connected.
		DIGITAL VIDEO	Defective DC-DC converter	Digital DD Control Block	U5601	Check if 3.3V, 2.5V, and 1.5V are activated (not short-circuited).
3	Power decrease of DIGITAL-DC-DC	DIGITAL VIDEO	Defective RST IC	Panel Flash Block	IC5301, IC5302, IC5303	
4	Panel having higher temperature	POWER SUPPLY	No startup of 12 V			
		DIGITAL VIDEO	Disconnection of cable	CN5202 - CN1071		
			Panel having higher temperature	Surrounding temperature		*Temperature detected by a sensor must not exceed 90°C (TEMP1).
			Speaker short-circuited	Speaker terminals		Check if the speaker cables are in contact with the chassis, etc.
5	Audio failure	AUDIO AMP	Defective AMP IC	Audio Amp	IC5003	
6	Communication failure of the module microcomputer	AUDIO AMP	Disconnection of cable	CN7601(AV1) - CN5001(AP2)		Check if the cable is disconnected or not securely connected.
		DIGITAL VIDEO	Communication failure in the module microcomputer or defective peripheral circuits	Module Ucom Block	IC5201	Check short/open of the communication line (TXDO/RXDO).
			Failure in writing in the module microcomputer	Module Ucom Block	IC5201	
			Defective 114-pin FPC	CN4004(D15) - CN7101(R10)	ADY1081	Check if the cable is disconnected or not securely connected.
7	Serial communication failure of the 3-wire of the main microcomputer	AV I/O	Communication failure in the IF microcomputer or defective peripheral circuits	IF Ucom Block	IC8702	Check short / open of the communication line (TXD_IF/RXD_IF/CLK_IF/BUSY_IF/CE_IF)
		RGB	Communication failure in the CELIA or defective peripheral circuits	IC2 Block	IC7004	Check short / open of the communication line (TXD_IC2/RXD_IC2/CLK_IC2/CE_IC2)
		RGB	Communication failure in the MIKE or defective peripheral circuits	IC3 Block	IC7101	Check short / open of the communication line (TXD_IC3/RXD_IC3/CLK_IC3/BUSY_IC2/CE_IC3)
		RGB	Failure in writing in the MIKE	IC3 Block	IC7101	
8	IIC communication failure of the main microcomputer (Confirm the SD subcategory in the factory menu)	VIDEO SLOT2	Failure in MICHAEL Y/C or defective peripheral circuits	IC1 (Y/C) Block	IC6255	
		VIDEO SLOT2	Failure in MICHAEL CVBS or defective peripheral circuits	IC1 (CVBS) Block	IC6107	
		RGB	Failure in AD MAIN or defective peripheral circuits	Main AD Block	IC6001	
		RGB	Failure in AD SUB or defective peripheral circuits	Sub LPF & AD Block	IC6602	
		RGB	Failure in ROZ or defective peripheral circuits	Bus SW1 Block	IC5701	
		RGB	Failure in ROZ or defective peripheral circuits	Bus SW2 Block	IC5801	
		AV I/O	Failure in VOL IC or defective peripheral circuits	AV I/O Assy	IC7603	
		AV I/O	Failure in HDMI Rx IC or defective peripheral circuits	IC6810 Block	IC6810	
		RGB	Failure in EEPROM or defective peripheral circuits	Main Ucom Block	IC7205	
		VIDEO SLOT2	Failure in EEPROM or defective peripheral circuits	IC1 (Y/C) Block	IC6257	
			Defective communication line between any of the above devices and the main microcomputer		IC7207	Check short / open of SCL_AV/SDA_AV, SCL_MA/SDA_MA and SCL_EP/SDA_EP

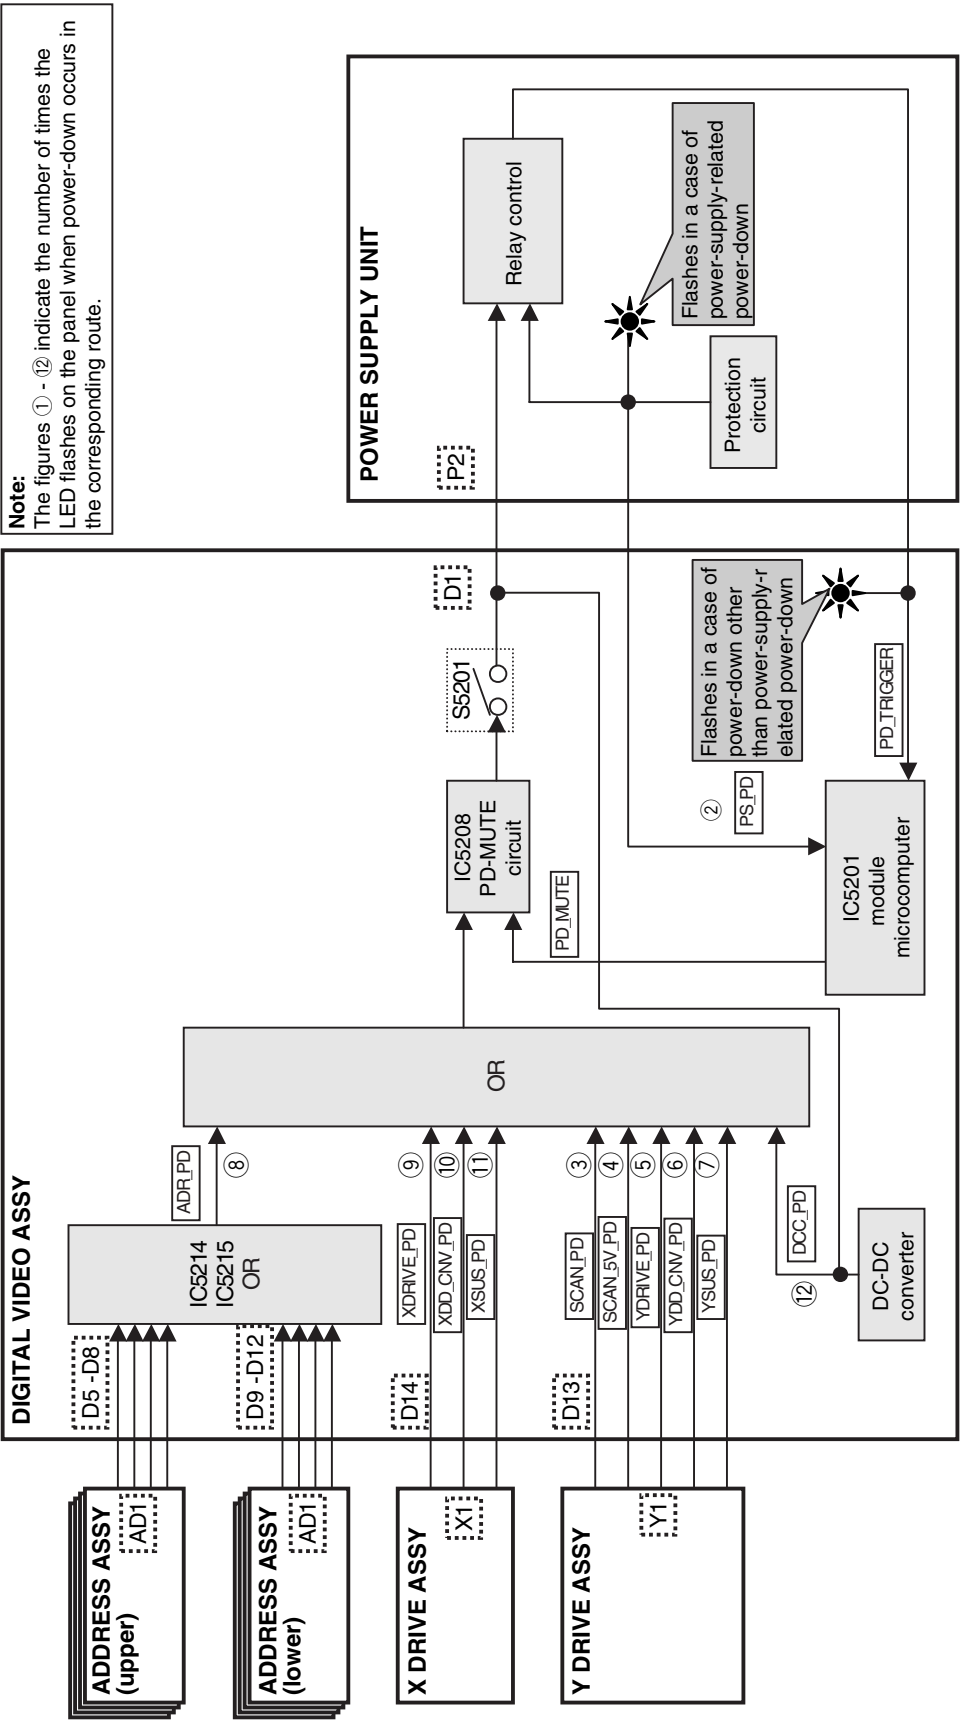

SD Circuit in Operation	Defective Assy	Reason for Shutdown	Point to be Checked	Possible Defective Part	Remarks
9	RGB	Communication failure in main microcomputer or defective peripheral circuits	Main Ucom Block	IC7207	Check short / open of communication line (TXD_IF/RXD_IF/CLK_IF/BUSY_IF/CE_IF/REQ_IF)
	RGB	Failure in writing in the main microcomputer	Main Ucom Block	IC7207	
10	FAN	Failure in the fan motor or fan stopped by attached dust			
	RGB	Disconnection of cable	Relay part between CN7402 (R8) and the wire from the fan		Check if the cable is disconnected or not securely connected.
11		Use under high temperature	Surrounding/internal temperature		Temperature detected by a sensor must not exceed 65°C (TEMP3) / 95°C (TEMP2)
	AUDIO AMP	Disconnection of cable	CN5003(AP3) - CN8702(SP1)		Check if the cable is disconnected or not securely connected.
14	AV I/O	Communication failure in EEPROM or defective peripheral circuits	I/F Ucom Block	IC8705	Check short / open of E2P_SCL/E2P_SDA
	VCC-D1	Defective circuits in the 12V system			Check for shortcircuits in the 12V system.
15	Other failures	Defective circuits in the 13.5V and 6.5V systems.			Check for shortcircuits in the 13.5V and 6.5V systems.
	VCC-D2	Defective circuits in the 3.3V system of HDMI 2.			Check for shortcircuits in the 3.3V system of HDMI 2.
	VCC-D4				

● Diagnosis of abnormalities other than shutdown and power-down

Symptoms	Defective Assy	Abnormal Summary	Point to be Checked	Possible Defective Part	Remarks
No power (LED unit)		Disconnection of cable	CN7404		Check if the connection between the POWER SUPPLY and RGB assemblies is properly made.
	POWER SUPPLY	STB 3.3 V not started	CN7404(AV1)-11 pin		
No power (The LED remains lit in red and does not light in green.)	AV I/O	Defective I/F microcomputer	I/F Ucom Block	IC8702	Check if the oscillation is normal (X8701 = 32 kHz, X8702 = 9.8 MHz) and if RESET is set to H (IC8703).
	RGB	Defective main microcomputer	Main Ucom Block	IC7207	If communication with the main microcomputer fails approx. 20 seconds after the AC power is on, the main microcomputer may be defective.
No power (The LED remains lit in red and dgreen.)		Detect Trap switch	CN7204		Check if the TRAP switch is secured in its position correctly. See "7.1.8 How to cancel the TRAP switch."
		Defective Trap switch		ASG1089	Check if the unit operates normally when the TRAP switch is canceled. See "7.1.8 How to cancel the TRAP switch."
Key input not effective		Disconnection of cable	CN4801 - CN9002 CN9001 - CN8702		Check if the cables are not connected or securely connected.
Remote control unit not effective	IR RECEIVE	Disconnection of cable	CN4901 - CN8901		Check if the cable is not connected or securely connected.
		Defective IR receiver section	IR	U4901	Check if a pulse is output when the key corresponding to Pin 3 of the CN4901 is pressed.
Abnormality in a one-eighth area of the screen	DIGITAL VIDEO	Defective IC4	IC4 Block	IC5401	Check if an abnormal area in the screen changes when the FPC connected to the address corresponding to the abnormal area is replaced with the one corresponding to the next address.
	ADDRESS				Check that an abnormal area in the screen does not change when the FPC connected to the address corresponding to the abnormal area is replaced with the one corresponding to the next address.
Abnormal screen (Data of every other dot are abnormal)		Defective 114-pin FPC	CN7101 - CN5001	ADY1081	Check if the FPC is broken or not securely connected.

### 7.1.3 PROCESSING AT THE TIME OF ABNORMALITIES

#### Fan and temperature sensor

##### ● Circuitry

##### ● Port monitoring specifications

Port Name	Shutdown Name	Assign	Control Microcomputer	Active	Remarks
FAN_NG	FAN	31	Main	Shutdown when the signal becomes high	Disconnection of the fan connector or abnormality in operation of the fan detected
TEMP1	Unit under high temperature	92	Module	Shutdown when the set value is exceeded	Monitoring high temperature of the panel, Drive system temperature compensation
TEMP2	Unit under high temperature	51	Main		Monitoring high temperature of boards
TEMP3	Unit under high temperature	50	Main		Monitoring ambient temperature

### 7.1.4 TEMPERATURE COMPENSATION OF DRIVE SYSTEM VOLTAGE

**Function:** To control the DRIVE-system voltage according to the temperature (Temperature compensation functions such that the voltage is lowered on the lower-temperature side and the voltage becomes higher on the higher-temperature side.)

**Purpose:** For improving the yield by compensating for the temperature characteristics of the panel

**Note:**

- Temperature compensation is performed only for the VSUS voltage, and not for the VOFS voltage. This compensation is controlled by the software.
- Temperature compensation is carried out with the value of TEMP1.

## 7.1.5 POWER ON/OFF FUNCTION FOR THE LARGE-SIGNAL SYSTEM

**Function:** Only the power for the low voltage lines (16 V, 12 V, and 6.5 V) is on, and the power for the high voltage lines (VSUS, VADR) is off.

**Usage:**

1. Use when only an operational check for the low voltage lines is required, such as when making repairs.
2. Use when rewriting of a program for each microcomputer is required.

**Methods:**

- 1 Set the slide switch (S5201) on the DIGITAL VIDEO Assy to its upper position ("DRF" is mentioned on the board see Fig. below).
2. Send the "DRF" RS232C command to turn the large-signal system off.
3. Send the "DRN" RS232C command to turn the large-signal system on.

**Notes:**

- As the unit enters Power-Down and Muting On mode when Methods 1 and 2 are performed, and power-downs other than those caused by the power (PS\_PD) and DC-DC-converter (DIGITAL\_DC-DC) circuits are not activated.
- If the slide switch is set from OFF to ON while the power is on, a power-down will occur. Be sure to turn the power off before switching the slide switch.
- Although the "DRF" RS232C command is enabled during Standby, if the power is turned on then turned off, the unit will return to "DRN" mode.

Fig. Drive OFF switch

### Outline

The data on the adjustment values for the main unit are stored in an EEPROM (IC5206, 4 kbits) on the DIGITAL VIDEO Assy. Part of the data (area A in the figure below) are automatically copied to an EEPROM (IC7102, 2 kbits) mounted on the RGB Assy for backup. When the DIGITAL VIDEO Assy is replaced, the backup data on the adjustment values for the main unit stored in the RGB Assy can be copied to the new DIGITAL VIDEO Assy, thus enabling you to omit newly performing adjustments on the main unit. The logs for the product (power-down log, etc.) can also be copied.

### Data to be backed up in the digital EEPROM (area A)

- Margin adjustment values (V<sub>sus</sub>, V<sub>ofset</sub>)
- Power upper-limit adjustment value (ABL)
- PANEL white-balance adjustment values (PANEL-R HIGH, PANEL-G HIGH, PANEL-B HIGH, PANEL-R LOW, PANEL-G LOW, PANEL-B LOW)
- Drive waveform adjustment values (X-SUS-U1, X-SUS-U2, X-SUS-D1, X-SUS-D2, Y-SUS-U1, Y-SUS-U2, Y-SUS-D1, Y-SUS-D2, Y-SUS-D3, Y-SUS-D4)
- Hour meter
- Pulse meter
- Number of times the power has been turned on
- PD/SD logs

### Basic flow of automatic backup

Using a keyword, the data in areas A and B are judged as to whether they have been adjusted or not, then copying is performed.

- ① The keyword on the DIGITAL VIDEO Assy is checked when the power is turned off, and if it is "adjusted", automatic backup is performed.
- ② If the keyword on the RGB Assy (Area B) is "adjusted," copying can be performed with the "BCP" RS232C command.

### Actual automatic backup operations

1. When the DIGITAL VIDEO Assy is replaced with an Assy for service

Changing of keywords is not required. Replace the DIGITAL VIDEO Assy with an Assy for service, and send the "BCP" RS232C command. Thus, the backup data in the EEPROM on the RGB Assy are copied to the EEPROM on the DIGITAL VIDEO Assy for service.

2. When a repaired DIGITAL VIDEO Assy is mounted on another unit (reuse of the repaired DIGITAL VIDEO Assy)

The keyword of the DIGITAL VIDEO Assy to be reused must be changed to "not adjusted" using the "UAJ" RS232C command.

Note 1: If a repaired DIGITAL VIDEO Assy is mounted in another unit (Unit 2) without this change of keyword, and the power to the unit 2 is turned off, the data in force before the repair of the DIGITAL VIDEO Assy will be copied to Area B of the RGB Assy of Unit 2, overwriting the data necessary for Unit 2. Once overwritten, the original data will not be restored.

3. When a repaired DIGITAL VIDEO Assy is mounted on the original unit (reuse of the repaired DIGITAL VIDEO Assy)  
Changing of keywords is not required. After the repaired DIGITAL VIDEO Assy is mounted in the original unit, the unit can operate with its latest adjustment values.

4. When both the DIGITAL VIDEO Assy and RGB Assy are simultaneously replaced with other assemblies  
The automatic backup function of this unit will not work properly.

Note 2: Readjustment of the main unit is required.

Note 3: After readjustment of the main unit, send the "FAJ" RS232C command to change the keyword of the DIGITAL VIDEO Assy to "adjusted." Thus, when the unit is turned off, automatic backup of adjustment data is performed properly.

Note 4: If readjustment of the main unit is totally impossible, it can be omitted by installing the EEPROM (IC5206, 4 kbits) originally mounted on the DIGITAL VIDEO Assy for service.

Note 5: After copying the backup data, turn the power off then back on to reflect the copied backup data.

## B ■ Miscellaneous

If the white balance (W/B) value is largely shifted because of aging, etc., W/B adjustment is required. (As this may be a rare case, the adjustment procedures are described below, just for your reference.

### [ W/B-adjustment procedures ]

The W/B adjustment can be performed with the RS232C commands. Minolta CA-100 color difference meter are required.

- ① Send the "FAY" RS232C command to enter Factory mode.
- ② Set the keyword for the DIGITAL VIDEO Assy to "not adjusted" with the "UAJ" RS232C command.
- ③ Obtain the current adjustment values in the two adjustment tables (see "6.6 Command Description").
  - Shifting to Table 1: Send the "M51" and "F60" commands. Obtaining the adjustment values: Send the "GPW" command.
  - Shifting to Table 2: Send the "M51" and "F75" commands. Obtaining the adjustment values: Send the "GPW" command.
- ④ For each table, set the brightness.
  - Adjustment in Table 1: After sending the "F60" command, perform adjustment.
  - Adjustment in Table 2: After sending the "F75" command, perform adjustment.

For each table, change the RGB parameters so that the values measured using a Minolta color difference meter (CA-100) become as indicated below. In this case, any one of PRH, PGH, or PBH must be set to 256.

	Cd/mm	
x	285	"PRH****" : 000 - 511
y	289	"PGH****" : 000 - 511
		"PBH****" : 000 - 511

- ⑤ Check after adjustment
  - Shifting to Table 1: Send the "F60" command. Obtaining the adjustment values: Send the "GPW" command.
  - Shifting to Table 2: Send the "F75" command. Obtaining the adjustment values: Send the "GPW" command.

Check that the adjustment data have been changed.
- ⑥ Change the keyword for the DIGITAL VIDEO Assy to "adjusted" by sending the "FAJ" RS232C command.  
**Note:** Use a Minolta CA-100 color difference meter or the equivalent for measurement. Otherwise, the specifications of the product cannot be assured.
- ⑦ Send the "FAN" RS232C command to enter Normal mode.
  - If the value is different from that you set, readjust it.

**Note:** To reset the adjustment to its original value, send the "BCP" RS232C command then turn the power off then back on to retrieve the backup data.

  - The setting values for color temperature differ between Factory mode and Normal mode. Therefore, the setting value for color-difference signals in Normal mode are different from those in Factory mode, even after the White Balance adjustment has been performed.

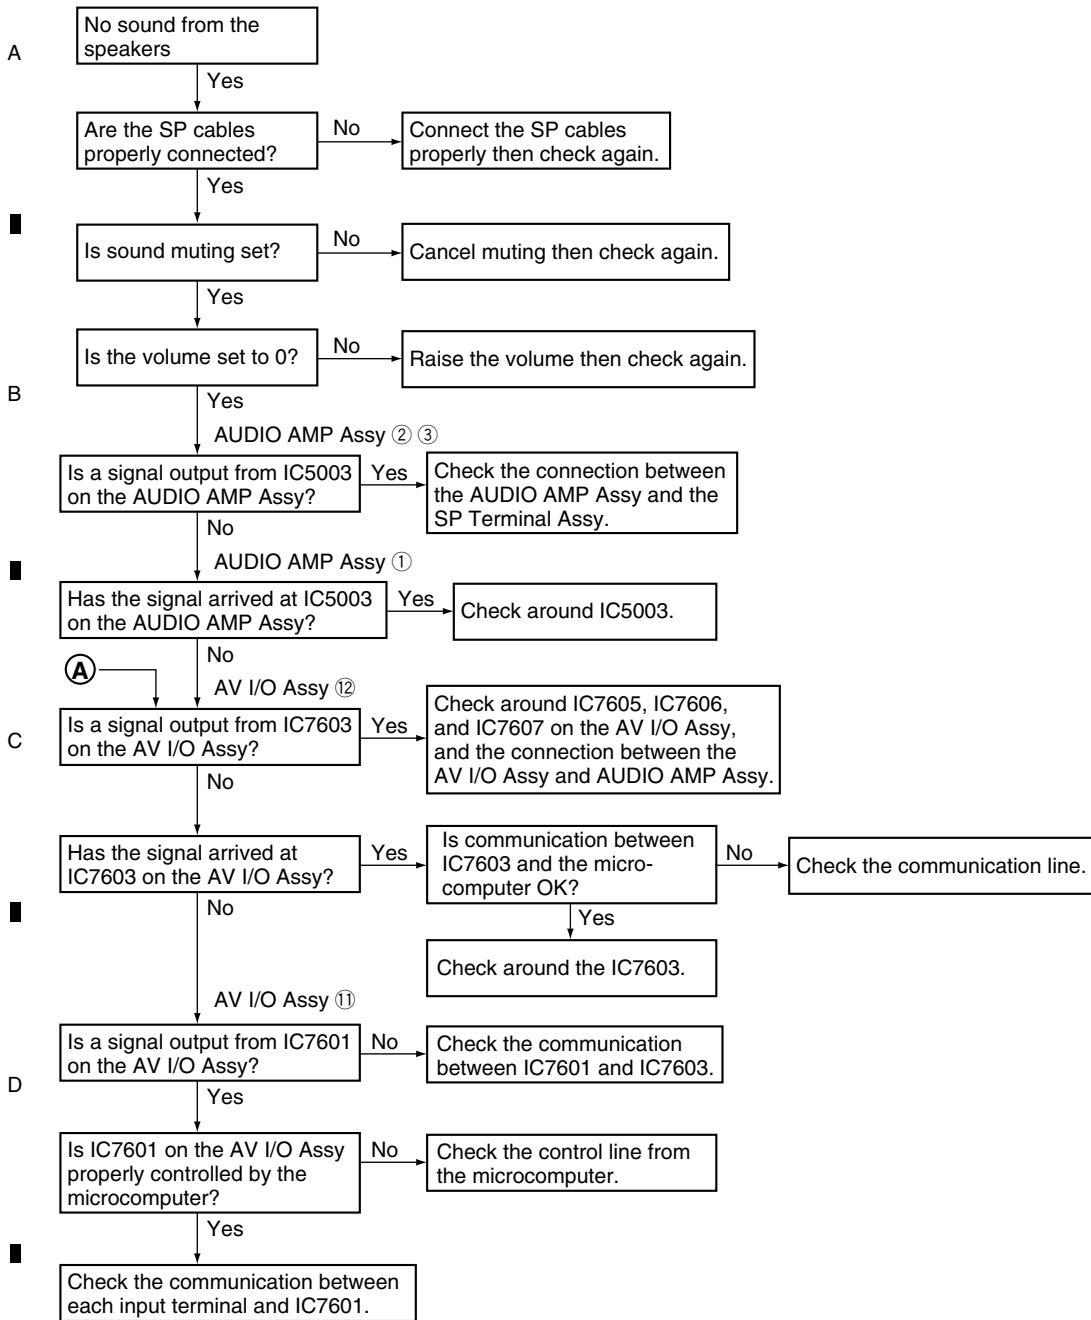

## 7.1.7 TROUBLESHOOTING

### Video

## Audio

## 7.1.8 CANCELING DETECTION BY THE TRAP SWITCH

### • Canceling detection by the TRAP switch

**Outline:** For video data transmission from the HDMI input to the plasma display, digital signals are used. Therefore, this unit adopts the HDCP (High-bandwidth Digital Content Protection) system for copyright protection. This unit is also provided with a detection switch (TRAP switch) that will prohibit the unit from being turned on again if the rear case of the unit is opened, in order to prevent the panel technology from being leaked out.

**Function:** To deactivate the detection of the TRAP switch

**Purposes:** 1. During production of this unit, adjusting with the rear cover opened is possible.  
2. During servicing or repairing, diagnoses of the assemblies are possible while the power is on.

**Methods:** For setting, use RS232C commands:

TSN: Ignore the monitoring of the switch

CTM: Clear the detection log of the switch

TSY: Reactivate monitoring of the switch

**Notes:**

- The TRAP switch is located on the chassis (see Fig. below).
- Once rear case opening is detected, send the TSN and CTM commands.
- Because the TSN command is not stored in memory, monitoring of the switch can be reactivated by turning the unit off then back on.
- The same setting is possible using the Factory menu.

### ● How to enter Factory mode using the remote control unit

Please refer to the technical documentation (Service knowhow).

### ● How to clear the detection log of the TRAP switch

In the INITIALIZE layer, hold the OSD key on the remote control unit pressed for at least 3 seconds.

### ● After a power-down, to cancel detection of the TRAP switch using only the remote control unit, follow the procedures below.

First, fix the TRAP switch to its depressed position. Set the drive ON/OFF switch in the DIGITAL VIDEO Assy to OFF, Then enter the Factory mode. Press the MUTE key five times, then hold the DISPLAY key pressed for at least 4 seconds. Set the AC switch on the panel to OFF. The log is also cleared. Then set the drive ON/OFF switch to ON.

Fig. TRAP switch

## 7.1.9 DISASSEMBLY

• PDP-5004, PDP-5014 models

### 1 Rear Case, Front Case Assy

① Remove the grip by removing the four screws.

**Note:**

When reattaching the grip, be sure to securely tighten the screws.

② Remove the six screws.

③ Remove the seventeen screws.

**Note :**

When reattaching the rear case, first attach the screws for the holes indicated with \*1 to place the rear case in the correct position.

④ Remove the rear case.

⑤ Remove the three screws.

⑥ Remove the one rivet.

⑦ Remove the lead cover.

⑧ Disconnect the flexible cable.

⑨ Remove the front case Assy.

**Note:**

If only the front case Assy must be removed, without removing the rear case, perform the steps ⑤ to ⑨.

## 2 Multi Base Section

### ● Diagnosis of AV I/O Assy

- ① Remove the Three screws.
- ② Remove the two hexagon head screws.
- ③ Remove the one screw.
- ④ Remove the one pin grommet.
- ⑤ Remove the AV I/O Assy with the AV I/O I/F Assy.

- ⑥ Remove the AV I/O Assy from the AV I/O I/F Assy.
- ⑦ Connect the AV I/O Assy to slot of the RGB Assy.

### Diagnosis

#### Note:

The cooling fan may rotate during diagnosis, in the following cases:

- When the rotation speed of the fan has been set to maximum for Integrator mode
- When the ambient temperature surrounding the temperature sensor is 35°C or higher

### ● Removing Multi Base Section

- ① Remove the two Torque screws.
- ② Remove the COMM SLOT Assy.
- ③ Remove the two Torque screws.
- ④ Remove the VIDEO SLOT 2 Assy.
- ⑤ Remove the nine screws.
- ⑥ Disconnect the some connectors at need.
- ⑦ Remove the terminal panel.

- ⑧ Remove the two screws.
- ⑨ Disconnect the some connectors at need.
- ⑩ Remove the multi base section.

#### Note:

Some tiny metal shavings may be released from the paring screw section when the VIDEO SLOT I/F Assy is detached from the sheet metal and is reattaching it to it. Be sure to clear away any shavings or other foreign matter before reattaching it to the RGB Assy.

### 3 X CONNECTOR A Assy, B Assy, 50 SCAN A Assy and B Assy

#### ● X CONNECTOR A and B Assy

- ① Remove the enclosure sheet 1.

**Note:**

Enclosure sheet 1 is attached to comply with the safety standards. Make sure that it will not be shifted or peeled off. If it is peeled off, securely reattach it in its original place.

- ② Remove the jumper wire by removing the flat clamp.

- ③ Remove the one nylon rivet.

- ④ Remove the one screw.

**Note:** Be sure to remove this screw. If you don't, the connector on the LED Assy may be damaged.

- ⑤ Remove the LED Assy.

- ⑥ Remove the front chassis VR (50M) by removing the five screws.

- ⑦ Remove the eight screws.

- ⑧ Remove the X CONNECTOR A and B Assy.

**Note when reassembling the front chassis VR (50M)**

Remove or loosen the screws that secure the panel holder in order not to damage the front protect panel Assy.

#### ● 50 SCAN A and B Assy

- ① Remove the one nylon rivet.

- ② Remove the jumper wire by removing the flat clamp.

- ③ Remove the one screw.

- ④ Remove the front chassis VL (50M) by removing the five screws.

- ⑤ Remove the SCAN heatsink by removing the two screws.

- ⑥ Remove the ten screws.

- ⑦ Disconnect the two pin connectors.

- ⑧ Remove the two spacers.

- ⑨ Remove the 50 SCAN A and B Assy.

**Note when reassembling the front chassis VL (50M)**

Remove or loosen the screws that secure the panel holder in order not to damage the front protect panel Assy.

## 1 Rear Case, Front Case Assy

① Remove the grip by removing the four screws.

**Note:**

When reattaching the grip, be sure to securely tighten the screws.

② Remove the six screws.

③ Remove the sixteen screws.

**Note :**

When reattaching the rear case, first attach the screws for the holes indicated with \*1 to place the rear case in the correct position.

④ Remove the rear case.

⑤ Remove the three screws.

⑥ Remove the one rivet.

⑦ Remove the lead cover.

⑧ Disconnect the flexible cable.

⑨ Remove the front case Assy.

**Note:**  
If only the front case Assy must be removed, without removing the rear case, perform the steps ⑤ to ⑨.

## 2 Multi Base Section

### ● Diagnosis of AV I/O Assy

- ① Remove the three screws.
- ② Remove the two hexagon head screws.
- ③ Remove the one screw.
- ④ Remove the one pin grommet.
- ⑤ Remove the AV I/O Assy with the AV I/O I/F Assy.

- ⑥ Remove the AV I/O Assy from the AV I/O I/F Assy.
- ⑦ Connect the AV I/O Assy to slot of the RGB Assy.

### Diagnosis

#### Note:

- The cooling fan may rotate during diagnosis, in the following cases:
- When the rotation speed of the fan has been set to maximum for Integrator mode
  - When the ambient temperature surrounding the temperature sensor is 35°C or higher

### ● Removing Multi Base Section

- ① Remove the two Torque screws.
- ② Remove the COMM SLOT Assy.
- ③ Remove the two Torque screws.
- ④ Remove the VIDEO SLOT 2 Assy.
- ⑤ Remove the nine screws.
- ⑥ Disconnect the some connectors at need.
- ⑦ Remove the terminal panel.

- ⑧ Remove the two screws.
- ⑨ Disconnect the some connectors at need.
- ⑩ Remove the multi base section.

#### Note:

- Some tiny metal shavings may be released from the paring screw section when the VIDEO SLOT I/F Assy is detached from the sheet metal and is reattached to it. Be sure to clear away any shavings or other foreign matter before reattaching it to the RGB Assy.

### 3 X CONNECTOR A Assy, B Assy, 43 SCAN A Assy and B Assy

#### ● X CONNECTOR A and B Assy

- ① Remove the enclosure sheet 1.

**Note:**

Enclosure sheet 1 is attached to comply with the safety standards. Make sure that it will not be shifted or peeled off. If it is peeled off, securely reattach it in its original place.

- ② Remove the jumper wire by removing the flat clamp.
- ③ Remove the one nylon rivet.
- ④ Remove the one screw.

**Note:** Be sure to remove this screw. If you don't, the connector on the LED Assy may be damaged.

- ⑤ Remove the LED Assy.
- ⑥ Remove the front chassis VR (43M) by removing the five screws.

- ⑦ Remove the six screws.
- ⑧ Remove the X CONNECTOR A and B Assy.

**Note when reassembling the front chassis VR (43M)**

Remove or loosen the screws that secure the panel holder in order not to damage the front protect panel Assy.

#### ● 43 SCAN A and B Assy

- ① Remove the one nylon rivet.
- ② Remove the jumper wire by removing the flat clamp.
- ③ Remove the one screw.
- ④ Remove the front chassis VL (43M) by removing the five screws.

- ⑤ Remove the four screws.
- ⑥ Disconnect the two pin connectors.
- ⑦ Remove the two spacers.
- ⑧ Remove the four spacers.
- ⑨ Remove the 43 SCAN A and B Assy.

**Note when reassembling the front chassis VL (43M)**

Remove or loosen the screws that secure the panel holder in order not to damage the front protect panel Assy.

## Pin Function

No.	Pin Name	Function	I/O	ACTIVE
1	VSUS	[D/A] Vofs power control	O	
2	VOFS	[D/A] Vofs power control	O	
3	TXD_IC4	3 serial communication with IC4MANTA - data transmission	O	
4	RXD_IC4	3 serial communication with IC4MANTA - data receive	I	
5	CLK_IC4	3 serial communication with IC4MANTA - clock output	O	
6	BYTE	(GND connection)	I	
7	CNVSS	Pin for processor mode setting (pull-down)	I	
8	NC	NC pin		
9	NC	NC pin		
10	RST_MD	Reset input	I	L
11	XOUT	Output for main clock	O	—
12	VSS	GND	—	—
13	XIN	Input for main clock	I	—
14	VCC1	Power supply = STB3.3V	—	—
15	NMI	(pull-up)	I	
16	REM_B	(Interruption) Remote control signal input (in the panel unit)	I	
17	KEY_B	(Interruption) Key signal input (in the panel unit)	I	
18	RST2	(Interruption) IC4 reset detection	I	L
19	HD_IN_B	HD signal existence distinction	I	L
20	PD_MUTE	Mute the power down output to the POWER SUPPLY Unit	O	L
21	PS_PD	PD signal in the POWER SUPPLY Unit	I	H
22	DCC_PD	PD signal of DC-DC converter	I	H
23	NC	NC pin		
24	NC	NC pin		
25	VD_IN	V. frequency count	I	L
26	EEPRST	EEPROM power SW	O	H
27	E_SCL	IIC clock output for EEPROM	O	
28	E_SDA	IIC data I/O for EEPROM	I/O	
29	TXD	Communication with flash ROM writer - data transmission	O	
30	RXD	Communication with flash ROM writer - data receive	I	
31	SCLK	Communication with flash ROM writer - clock input	I	
32	BUSY	Communication with flash ROM writer - busy output	O	
33	TXD0	UART communication with main UCOM (external PC) - data transmission	O	
34	RXD0	UART communication with main UCOM (external PC) - data receive	I	
35	NC	NC pin		
36	REQ_MD	Communication request to the main UCOM	O	H
37	PSW_D	Mute of DC-DC converter	O	H
38	WE_IC4	In IC4 (MANTA) rewriting, control for communication path switch	O	H
39	EPM	Setting pin for flash rewriting mode (pull-down)	I	
40	IC4_RST	IC4 forced reset	O	L
41	IC4_CE	Enable for IC4 communication	O	L
42	IC4_BUSY	Busy input for IC4 communication	I	H
43	REQ_IC4	Communication request from the IC4	I	H
44	CE	Setting pin for flash rewriting mode (pull-up)	I	
45	PSIZE	Panel size distinction	I	
46	B_SCL	IIC clock output for backup EEPROM	O	H
47	B_SDA	IIC DATA I/O for backup EEPROM	I/O	H
48	ADR_PD	PD signal of address junction	I	H
49	LED_G	Green LED control	O	L
50	LED_R	Red LED control	O	L

No.	Pin Name	Function	I/O	ACTIVE
51	DRV_OFF	Driving OFF	O	H
52	RELAY	Power ON control output	O	H
53	POWER	Power ON control input	I	H
54	MR_ST_B	MDR connection detection	I	L
55	OP_DET	Rear case open detection	I	
56	NC	NC pin		
57	PNL_MUTE	Panel mute	I	
58	DITHER	PC/VIDEO dither switch (panel module exclusive use)	I	
59	NC	NC pin		
60	VCC2	Power supply = STB 3.3V	—	—
61	PD_TRG	PD detection	I	L
62	VSS	GND	—	—
63	VH_PD	Vh power decrease PD	I	H
64	YDRV_PD	Y drive PD signal	I	H
65	YRES_PD	Y drive PD signal	I	H
66	YDCDC_PD	PD signal of Y drive DC-DC converter	I	H
67	IC5V_PD	5V power decrease PD	I	H
68	XSUS_PD	X drive PD signal	I	H
69	XDCDC_PD	PD signal of X drive DC-DC converter	I	H
70	XDRV_PD	X drive PD signal	I	H
71	NC	NC pin		
72	MR_AC	MR power monitor	I	H
73	AC_DET	AC power monitor at panel side (same signal as CST1)	I	L
74	DVI_MUTE	Mute of panel link output	O	H
75	A_MUTE	Audio mute	O	H
76	A_NG	Audio NG detection	I	L
77	A_SCL	IIC clock output for audio/others	O	L
78	A_SDA	IIC data I/O for audio/others	I/O	L
79	TRUBASS	TRUBASS ON/OFF	O	H
80	STB_SW	Standby setting of audio amp.	O	L
81	FOCUS	FOCUS ON/OFF	O	H
82	SRS	SRS ON/OFF	O	H
83	DDC_WP	DDCROM write protection	O	H
84	DVI_DET	DVI cable disconnection detection	I	H
85	RSTBTMDS	Reset detection of panel link receiver	I	L
86	L_SYNC	DE omission detection of the panel link	I	L
87	NC	NC pin		
88	NC	NC pin		
89	MASK1	[A/D] Mask display setting	I	
90	MAX_PLS2	[A/D] Brightness setting for panel module	I	
91	MAX_PLS1	[A/D] Brightness setting for panel module	I	
92	TEMP	[A/D] AD input for temperature sensor	I	
93	MODE	[A/D] Operation mode setting	I	
94	AVSS	GND for A/D input	—	—
95	MODEL	[A/D] CMX/HD/TV/WX distinction	I	
96	VREF	Reference voltage for A/D input	—	—
97	AVCC	Power supply for A/D input = STB3.3V	—	—
98	NC	NC pin		
99	NC	NC pin		
100	AMG_MD	Address emergency monitor	I	H

23	VDD	–	Power supply (3.3V)
24	GND	–	Ground
25	GND	–	Ground
26	PVD	–	PLL power supply (3.3V)
27	PVD	–	PLL power supply (3.3V)
28	GND	–	Ground
29	COAST	I	PLL COAST signal input
30	HSYNC	I	Horizontal sync. input
31	VSNC	I	Vertical sync. input
32	GND	–	Ground
33	FILT	–	External filter connection pin for built-in PLL
34	PVD	–	PLL power supply (3.3V)
35	PVD	–	PLL power supply (3.3V)
36	GND	–	Ground
37	MIDSCV	–	Internal middle scale voltage bias
38	CLAMP	I	Clamp input (External clamp signal)
39	VD	–	Analog power supply (3.3V)
40	GND	–	Ground
41	GND	–	Ground
42	VD	–	Analog power supply (3.3V)
43	BAIN	I	Analog input for converter B
44	GND	–	Ground
45	VD	–	Analog power supply (3.3V)

F

No.	Pin Name	I/O	Pin Function
46	VD	–	Analog power supply (3.3V)
47	GND	–	Ground
48	GAIN	I	Analog input for converter G
49	SOGIN	I	Input for Sync-on Green
50	GND	–	Ground
51	VD	–	Analog power supply (3.3V)
52	VD	–	Analog power supply (3.3V)
53	GND	–	Ground
54	RAIN	I	Analog input for converter R
55	A0	I	Address input 1 of serial port
56	SCL	I	Data clock (max. 100kHz) of serial port
57	SDA	I/O	Data input/output of serial port
58	REF BYPASS	–	Internal reference bypass
59	VD	–	Analog power supply (3.3V)
60	GND	–	Ground
61	GND	–	Ground
62	VD	–	Analog power supply (3.3V)
63	GND	–	Ground
64	VSOUT	O	VSYS output (phasing with DATACLK)
65	SOGOUT	O	Sync-on-Green slicer output
66	HSOUT	O	HSYS output (phasing with DATACLK)
67	DATACLK	O	Data input/output clock
68	GND	–	Ground
69	VDD	–	Power supply (3.3V)
70	RED 7	O	Converter Red output (MSB)
71	RED 6	O	Converter Red output

# ● Pin Function

No.	Pin Name	I/O	Pin Function
1	GINA/UINA	I	Analog GINA or UINA signal input. Sync signal is input on SYNCIN pin.
2	GSG1	I	GOUT/UOUT output buffer gain set input
3	GINB/UINB	I	Analog GINB or UINB signal input. Sync signal is input on SYNCIN pin.
4	(NC)	–	No connection
5	BINA/VINA	I	Analog BINA or VINA signal input. Sync signal is input on SYNCIN pin.
6	GSB1	I	BOUT/VOUT output buffer gain set input
7	BINB/VINB	I	Analog BINB or VINB signal input. Sync signal is input on SYNCIN pin.
8	(NC)	–	No connection
9	DISABLE	I	Power save function. Built-in pull-down resistor. L : Enable H : Disable (Output pins: ROUT/YOUT, GOUT/UOUT, and BOUT/VOUT are high impedance.)
10	GND3	–	Analog ground
11	BOUT/VOUT	O	B/V signal output
12	VCC3	–	Analog 5V supply
13	GND2	–	Analog ground
14	GOUT/UOUT	O	G/U signal output
15	VCC2	–	Analog 5V supply
16	GND1	–	Analog ground
17	ROUT/YOUT	O	R/Y signal output
18	VCC1	–	Analog 5V supply
19	GND4	–	Analog ground
20	RFC	–	LPF (lowpass filter) cutoff frequency setting resistor connection
21	VFC	I	LPF (lowpass filter) cutoff frequency setting voltage input
22	MUXSEL	I	Input select signal. Built-in pull-down resistor. L : XINA pin select H : XINB pin select
23	THROUGH	I	Filter through Built-in pull-down resistor. L : Filter function H : Filter through (buffer only)
24	VCC4	–	Analog 5V supply
25	RINA/YINA	I	Analog RINA or YINA signal input. Sync signal is input on SYNCIN pin.
26	GSR1	I	ROUT/YOUT output buffer gain set input
27	RINB/YINB	I	Analog RINB or YINB signal input. Sync signal is input on SYNCIN pin.
28	(NC)	–	No connection

BA7078AF (RGB ASSY : IC6604)

- Synchronous seperation IC

● Block Diagram

# ● Pin Function

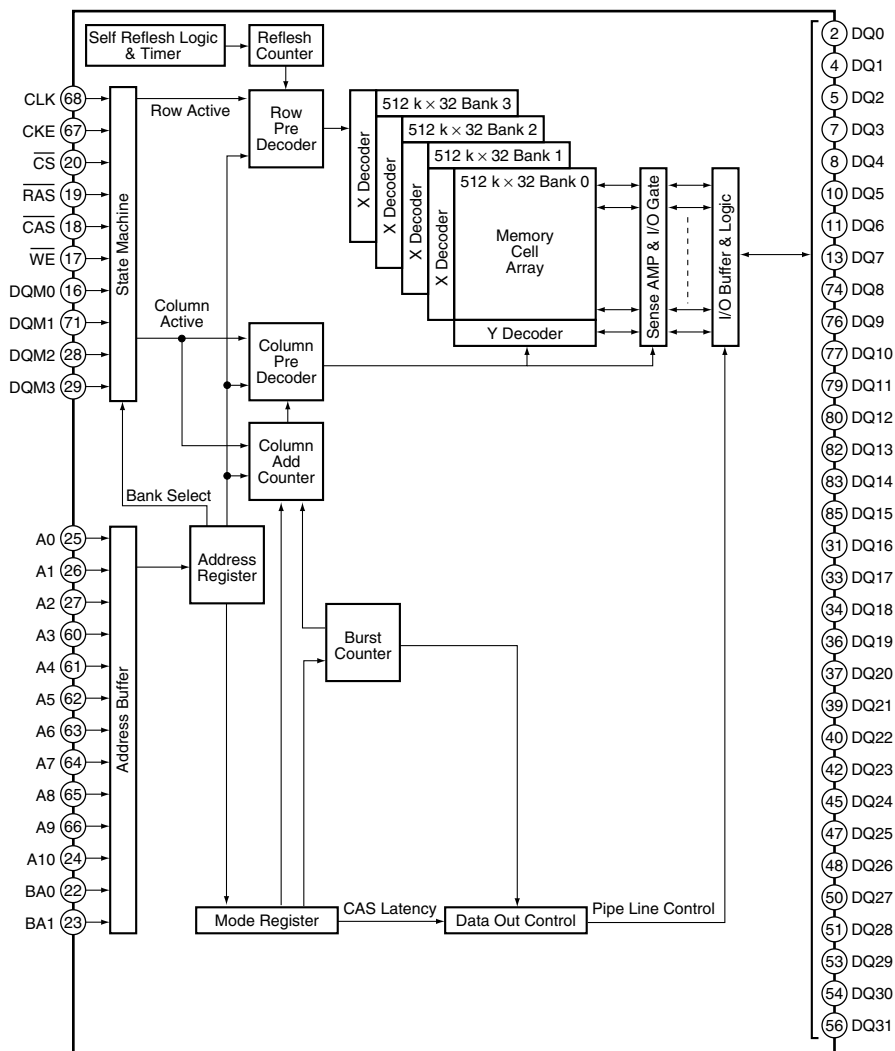

No.	Pin Name	Pin Function
1	HSCTL	HDRV output Used to select whether to output the VDRV section of the HDRV output signal. High : VDRV section of HDRV is output Low : VDRV section of HDRV is not output
2	C/HSYNC IN	Composite sync / H SYNC input Input either the composite synchronization signal or the horizontal synchronization signal. Input is clamped, and is initiated by capacitor coupling.
3	VIDEO IN	SYNC ON VIDEO input Inputs the SYNC ON VIDEO signal(green). Input is sink chip clamped. Input is initiated by capacitor coupling.
4	VSEPA	f-V conversion Converts the horizontal synchronization signal frequency into a voltage. The voltage generated is proportional to the frequency of the horizontal synchronization signal. Attach a 0.56 $\mu$ F capacitor between the ground pins.
5	VSIN	V SYNC input Inputs the vertical synchronization signal.
6	CVPOL	Vertical polarity integration Integrates the vertical synchronization signal polarity detection circuit. Attach a 1.5 $\mu$ F capacitor between this pin and the ground.
7	CVEXI	Vertical existence integration Integrates the vertical synchronization signal existence detection circuit. Attach a 1 $\mu$ F capacitor between this pin and the ground.
8	CPSEL	Setting the clamp position Used to set the clamp pulse generation position to either the front or back edge of HSYNC High : The front edge is the generation position Open : Composite / H SYNC IN : The front edge is the generation position VIDEO IN : The back edge is the generation position Low : The back edge is the generation position
9	GND	Ground
10	CPWID	Setting the clamp pulse width Sets the clamp pulse width according to the attached time constant. Attach a resistor between this pin and VCC and, a capacitor between this pin and GND. When R = 3.9k $\Omega$ and C = 100pF, pulse width is approximately 400 ns. Set the resistor to register an abnormality at 1k $\Omega$ .
11	VDRV	VDRV output Outputs the vertical synchronization signal. The output signal has positive polarity.
12	CLAMP	Clamp output Outputs the clamp pulse generated from the vertical synchronization signal. The output signal has a positive polarity.
13	HDRV	HDRV output Outputs the clamp pulse generated from the horizontal synchronization signal. The output signal has positive polarity.
14	Vcc	Power supply
15	EXIV	Vertical existence output Indicates whether the vertical synchronization signal exists.
16	POLV	Vertical polarity output Indicates the polarity of the vertical synchronization signal.
17	EXIH	Horizontal existence output Indicates whether the horizontal synchronization signal exists.
18	POLH	Horizontal polarity output Indicates the polarity of the horizontal synchronization signal.

2	ADDRESS	I	I <sup>2</sup> C slave address setting
3	R/CrOUT	O	Amplifier output signal monitor
4	NC	–	Not used
5	NC	–	Not used
6	XPOWER SAVE	I	Power save setting
7	DGNDREG	–	Register GND
8	DVccREG	–	Register power supply
9	SDA	I	Control register data input
10	SCL	I	Control register CLK input
11	XSENABLE	I	Enable signal input for 3-wire control register
12	SEROUT	O	3-wire control register data readout
13	3WIRE/I <sup>2</sup> C	I	Selection of input between I <sup>2</sup> C bus and 3-wire bus
15	AVccADREF	–	Reference power supply for A/D converter
16, 94	AVccAD3	–	Analog power supply for A/D converter
17	VRT	O	Top reference voltage output for A/D converter
18, 92	DVccAD3	–	Digital power supply for A/D converter
19, 32, 42, 54, 65, 76, 90	DVccADTTL	–	TTL output power supply for A/D converter
20, 33, 44, 55, 67, 77, 89	DGNDADTTL	–	TTL output GND for A/D converter
21, 22, 24-28, 31	RA0 - RA7	O	Data output for R-channel port A side
23, 30, 43, 50, 59, 66, 79, 86	DGNDAD3	–	Digital GND for A/D converter
29, 80	AGNDAD3	–	Analog GND for A/D converter
34-41	RB0 - RB7	O	Data output for R-channel port B side
45-49, 51-53	BA0 - BA7	O	Data output for B-channel port A side
56-58, 60-64	BB0 - BB7	O	Data output for B-channel port B side
68-75	GA0 - GA7	O	Data output for G-channel port A side
78, 81-85, 87, 88	GB0 - GB7	O	Data output for G-channel port B side
91	DVccAD	–	Digital power supply for A/D converter
93	VRB	O	Bottom reference voltage output for A/D converter
95	AGNDADREF	–	Reference voltage GND for A/D converter
96	DVccPLLTTTL	–	TTL output power supply for PLL
97	DGNDPLLTTTL	–	TTL output GND for PLL
98	XCLK	O	Inverted CLK output
99	CLK	O	CLK output
100	1/2XCLK	O	Inverted 1/2CLK output
101	1/2CLK	O	1/2CLK output
103	DSYNC/DIVOUT	O	DSYNC or DIVOUT signal output
104	UNLOCK	O	Unlock signal output
105	SOGOUT	O	Output for SYNC ON GREEN
106	HOLD	I	Input for phase comparison disable signal

A

No.	Symbol	I/O	Pin Function
107	XTLOAD	I	Programmable counter reset setting
108	EVEN/ODD	I	Inverted pulse input of ADC sampling CLK
109	XCLKIN	I	Inverted CLK input for testing
110	CLKIN	I	CLK input for testing
111	SYNCIN1	I	Sync input 1
112	SYNCIN2	I	Sync input 2
113	CLPIN	I	Clamp pulse input
114	DVccPLL	–	Digital power supply for PLL
115	DGNDPLL	–	Digital GND for PLL
116	AVccVCO	–	Analog power supply for PLL VCO
117	AGNDVCO	–	Analog GND for PLL VCO
118	RC1	–	External pin for PLL loop filter
119	RC2	–	External pin for PLL loop filter
120	AVccIR	–	Analog power supply for IREF
121	IREF	I	Current setup
123	AGNDIR	–	Analog GND for TREF
124	G/YIN1	I	G/Y signal input 1
125	AVccAMPG	–	Power supply for G/Y amplifier block
126	G/YIN2	I	G/Y signal input 2
127	AGNDAMPG	–	GND for G/Y amplifier block
128	G/YCLP	–	Clamp capacitor for brightness

### ● Block Diagram

# 8. PANEL FACILITIES

## ■ MAIN UNIT

### Main unit

- ① **Remote control sensor**  
Point the remote control toward the remote sensor to operate the unit.
- ② **ON indicator**  
Lights green when the plasma display is operating.  
When flashing, the indicator is used to indicate error messages.
- ③ **STANDBY indicator**  
Lights red when the unit is in standby mode.  
When flashing, the indicator is used to indicate error messages.
- ④ **Handles**  
The plasma displays PDP-5004 and PDP-4304 utilize differing methods of handle attachment, but the handles themselves are used in the same way.

### Operation panel on the main unit

- ⑤ **STANDBY/ON button**  
Press to put the display in operation or standby mode.
- ⑥ **INPUT button**  
Press to select the input.
- ⑦ **SCREEN SIZE button**  
Press to select the screen size.
- ⑧ **VOLUME (+/-) buttons**  
When not indicated for use in onscreen menu items, these buttons are used for adjusting the sound volume.
- ⑨ **AUTO SET UP button**  
When using computer signal input, automatically sets the [POSITION], [CLOCK] and [PHASE] to optimum values.

## ■ CONNECTION PANEL

Illustration depicts PDP-5004, PDP-5014, PDP-4304 and PDP-4314 models.

### Plasma Display Section

The plasma display is provided with 5 video input connectors, 1 video output connector, audio input jacks and speaker terminals.

For instructions regarding connections, consult the pages noted in parentheses by each item.

- ① **SPEAKER (R) terminal**  
For connection of an external right speaker.  
Connect a speaker whose impedance is 8 – 16Ω .
- ② **RS-232 Terminal (used in the factory setup)**
- ③ **ANALOG RGB IN (INPUT1) (mini D-sub 15 pin)**  
For connecting components equipped with RGB outputs jacks, such as a personal computer or external RGB decoder; or components equipped with component output jacks, such as a DVD recorder. Make sure that the connection made corresponds to the format of the signal output from the connected component.
- ④ **AUDIO (INPUT1) (RCA pin jack)**  
Use to obtain sound when INPUT1 is selected.  
Connect this jack to the audio output connector of the device connected to INPUT1 to this unit.

#### Note

The left audio channel (L) jack is not compatible with monaural input sources.

### ⑤ AUDIO (INPUT2) (RCA Pin jacks)

Use to obtain sound when INPUT2 (analog audio) is selected.

Connect these jacks to the audio output connectors of components connected to INPUT2.

#### Note

The left audio channel (L) jack is not compatible with monaural input sources.

### ⑥ HDMI (INPUT2) (HDMI jack)

For connection of components that have a digital video output terminal such as a digital set top box, DVD player, etc. compatible with HDCP. Before attempting to connect one of these devices, read its operating instructions to make sure that it can be connected.

(HDCP = High-bandwidth Digital Content Protection)  
(HDMI = High Definition Multimedia Interface)

### ⑦ MAIN POWER switch

Use to switch the main power of the plasma display on and off.

### ⑧ AC IN

A power cable is furnished with the plasma display; connect one end of the power cable to this connector, and the other end to a standard AC power source.

**⑨ SPEAKER (L) terminal**

For connection of an external left speaker. Connect a speaker that has an impedance of 8 –16Ω.

**⑩ S-VIDEO (INPUT3) (S-video jack)**

For connection of components that have an S-video output jack such as a video deck, video camera, laser disc player, or DVD recorder.

**⑪ AUDIO R/L (INPUT3) (RCA Pin jacks)**

Use to obtain sound when INPUT3 is selected.  
Connect these jacks to the audio output connectors of components connected to INPUT3 to this unit.

**⑫ VIDEO IN (INPUT4) (RCA Pin jack)**

For connection of components that have a composite video output jack such as a video deck, video camera, laser disc player, or DVD recorder.

**⑬ VIDEO OUT (INPUT4) (RCA Pin jack)**

Use the VIDEO OUT (INPUT4) jack to output the video signal to an external monitor or other component.

**Note**

The video signal will not be output from the VIDEO OUT (INPUT4) jack when the main power of this display is off or in standby mode.

**⑭ AUDIO R/L (INPUT4) (RCA Pin jacks)**

Use to obtain sound when INPUT4 is selected.  
Connect these jacks to the audio output connectors of components connected to INPUT4 to this unit.

**⑮ COMPONENT VIDEO (INPUT5) (RCA Pin jacks)**

For connection of components that have component video output jacks such as a DVD recorder.

**⑯ AUDIO R/L (INPUT5) (RCA Pin jacks)**

Use to obtain sound when INPUT5 is selected. Connect these jacks to the audio output connectors of components connected to INPUT5 to this unit.

## ■ REMOTE CONTROL UNIT

[PDP-5004, PDP-4304]

- ① **SCREEN SIZE button**  
Press to select the screen size.
- ② **INPUT buttons**  
Press to select the input.
- ③ **MENU button**  
Press to open and close the on-screen menu.
- ④ **ADJUST (▲/▼/▶/◀) buttons**  
Use to navigate menu screens and to adjust various settings on the unit.
- ⑤ **SET button**  
Press to adjust or enter various settings on the unit.
- ⑥ **AV SELECTION button**  
Press to switch to Picture settings.  
(VIDEO mode: DYNAMIC, STANDARD, MOVIE, GAME, USER  
PC mode: STANDARD, USER)
- ⑦ **SUB INPUT button**  
During multi-screen display, use this button to change inputs to subscreens.
- ⑧ **SPLIT button**  
Press to switch to multi-screen display.
- ⑨ **MUTING button**  
Press to mute the volume.
- ⑩ **AUTO SET UP button**  
When using computer signal input, automatically sets the [POSITION], [CLOCK] and [PHASE] to optimum values.
- ⑪ **STANDBY/ON button**  
Press to put the unit in operation or standby mode.
- ⑫ **DISPLAY button**  
Press to view the unit's current input and setup mode.
- ⑬ **SWAP button**  
During multi-screen display, use this button to switch between main screen and subscreen.
- ⑭ **PIP SHIFT button**  
When using PinP mode with multi-screen display, use this button to move the position of subscreen.
- ⑮ **VOLUME (+/-) buttons**  
Use to adjust the volume.

## ■ INSTALLATION OF THE UNIT UNIT

### Installation using the optional PIONEER stand or installation bracket

- Please be sure to request installation or mounting of this unit or the installation bracket by the dealer where purchased.
- When installing, be sure to use the bolts provided with the stand or installation bracket.
- For details concerning installation, please refer to the instruction manual provided with the stand or installation bracket.

### Installation using accessories other than the PIONEER stand or installation bracket (sold separately)

- When possible, please install using parts and accessories manufactured by PIONEER. PIONEER will not be held responsible for accident or damage caused by the use of parts and accessories manufactured by other companies.
- For custom installation, please consult the dealer where the unit was purchased.

### Wall-mount installation of the unit

This unit has been designed with bolt holes for wall-mount installation, etc. The installation holes that can be used are shown in the diagram below.

- Be sure to attach in 4 or more locations above and below, left and right of the center line.
- Use bolts that are long enough to be inserted 1/2 inch (12 mm) to 11/16 inch (18 mm) into the main unit from the attaching surface for both a holes.
- Refer to the side view diagram below.
- As this unit is constructed with glass, be sure to install it on a flat, unwarped surface.

#### ⚠ CAUTION

To avoid malfunction, overheating of this unit, and possible fire hazard, make sure that the vents on the main unit are not blocked when installing. Also, as hot air is expelled from the air vents, be careful of deterioration and dirt build up on rear surface wall, etc..

#### ⚠ CAUTION

Please be sure to use an M8 (Pitch = 1.25 mm) bolt (Only this size bolt can be used).

#### ⚠ CAUTION

This display unit weighs at least 67 lbs (30 kg) and has little front-to-back depth, making it very unstable when stood on edge. As a result, two or more persons should cooperate when unpacking, moving, or installing the display.

#### ⚠ CAUTION

This unit incorporates a thin design. To ensure safety if vibrated or shaken, please be sure to take measures to prevent the unit from tipping over.
